GROWING, GARDENING & NURSERY NEEDS

SAME DAY SHIPPING

Order before 12pm central time M-F for same day shipping on most in stock items

WELCOME TO THE GROWERS SUPPLY FAMILY

It's our mission to enhance your life by bringing you products that solve your problems and simplify managing your business, garden center or home. Since 1979, we have been committed to meeting your needs. That commitment encompasses many things. It provides shopping from a collection of over 30,000 of the highest quality products available. It means our friendly National Account Managers are here to listen to you and respond with accurate, helpful solutions. We hope you enjoy your Growers Supply experience. - Barry Goldsher, CEO

Shop our **FULL LINE** of Growers Supply Products at www.GrowersSupply.com

We've recently condensed our catalog to improve and simplify your shopping experience. Although you might not see some of the products you've purchased in the past in this catalog, you can still find them at www.GrowersSupply.com or by calling one of our National Account managers at 1.800.476.9715. Browse our website or call today to find your favorite products.

PAYMENT OPTIONS

Sending a Payment - Mail it to:

A.R. Department, 1395 John Fitch Blvd., South Windsor, CT 06074

Credit Cards - Simple, fast & convenient

Contact one of our National Account Managers to place and pay for your order all in one quick and easy process.

Financing

We are proud to announce a new in-house financing plan that includes rates as low as 5.99%. Whether you are adding a fabric structure or simply upgrading your light fixtures, our flexible financing plans allow you to get your projects completed. Finance as little as \$5,000 by trusting your next project to us. Contact us for more information or to begin planning your next project today.

Returns - 100% Guarantee

If for any reason you are not satisfied with your purchase, you can return the item(s) to us within 30 days. Simply call 1.800.245.9881 and our friendly Customer Service Associates will then instruct you where to send the merchandise. Please note, special order items are not returnable. Returns will not be accepted if shipped COD.

A GrowSpan Round Premium High Tunnel will enhance your crop yield, quality and profitability up to 50%.

- Frames are manufactured from our USA-made, triple-galvanized structural steel tubing.
- Available with our 6 mil 4 year Clear Greenhouse Film or our 5.2 oz., 12 mil Clear Greenhouse Covering.
- Our Sun Master® 6 mil 4 year Clear Greenhouse Film is made from strong copolymer resin, with tri-layer construction and UV additives. This film offers 92% light transmission and comes with a 4 year warranty.
- Our PolyMax® 5.2 oz., 12 mil Clear Woven Greenhouse Covering, with added UV inhibitors, is superior to all greenhouse fabrics, offers 85% light transmission and comes with a 4 year warranty.
- Structures 20'W or wider can be designed with Zippered or Roll-Up Ends. Both options are manufactured from 10 oz., 22 mil premium rip-stop translucent fabric.
- Triple-zippered end panels feature our Heavy Duty, industrial-strength #15 Heavy Duty Zippers and come complete with fabric clips for attaching.
- Four-sided ventilation is easy. Roll-Up Sides and Ends feature our exclusive "Twist-of-the-Wrist" Roll-Up Assembly.
- Rafter spacing: 4'.
- Heavy Duty ground posts are included.
- We recommend using a baseboard.
- Optional Rafter Support Kits provide extra support for areas with heavy snow or high winds.

GrowSpan Single Bay High Tunnels

- These economically priced high tunnels reap payback with most crops in just 2 to 3 years.
- Plant earlier, harvest late into fall or early winter.
- Frames are manufactured from our 14-gauge, USA-made, triple-galvanized structural steel tubing.
- 24'W high tunnels use 1.66" OD pipe. 28'W high tunnels use 1.90" OD pipe.
- Our Sun Master® 6 mil 4 year clear greenhouse film covering is made from strong copolymer resin for strength and durability. Anti-dust additives repel dirt and dust and allow for 92% light transmission.
- Tri-layer film has UV additives and comes with a 4 year warranty.
- End Panels are manufactured from our 10 oz. 22 mil clear premium rip-stop greenhouse fabric and each comes complete with 20'W x 10'H Roll-Up Door that utilizes our Hand-Crank Assembly.
- Purchase 4 x 4s locally to strengthen and finish off the ends.
- Well-sealed tunnel during the cold months allows early production. Late spring and hot summer months, enjoy the benefits of full ventilation. Unique cross-bracing feature adds extra strength and durability.
- Rafter spacing: 7'. Sidewall height: 4'.
- Ridge purlin and heavy Duty ground posts are included.

108210	28'W x 10'11-1/2"H x 203'L	13,095.00

Save money on watering by utilizing rainwater.

- This system is designed to catch rainwater off of a greenhouse or high tunnel. The water can then be used to keep plants hydrated and healthy and can cut back on watering and irrigation costs.
- It can be used on both sides of the structure to catch as much water as possible.
- Installation is simple and the system won't interfere with Roll-Up or Drop-Down Sides.
- Tank not included.

RAINWATER CATCH DRAINS

STK#	ITEM	EACH
113577	36' High Tunnel Rain Catchment System	\$475.00
113578	48' High Tunnel Rain Catchment System	535.00
113579	60' High Tunnel Rain Catchment System	659.00
113580	72' High Tunnel Rain Catchment System	789.00
113581	96' High Tunnel Rain Catchment System	915.00

GrowSpan Gothic Premium High Tunnels, with 6'H sidewalls, sufficiently modify the environment to enhance crop growth, quality and yield. These high tunnels offer temperature control, protection from wind, rain, disease and predators.

- Frames are constructed with our 14-gauge, USA-made, triple-galvanized structural steel tubing. 20'W and 26'W tunnels use 1.66" OD pipe. 30'W tunnels use 1.90" OD pipe.
- Available with either our superior PolyMax® 5.2 oz., 12 mil thick Clear Woven Greenhouse Covering or our Sun Master® 6 mil 4 year Clear Greenhouse Film.
- Our PolyMax® 5.2 oz., 12 mil Clear Woven Greenhouse Covering comes with a 4 year warranty. With added UV inhibitors, this cover offers 85% light transmission, has excellent cold-crack resistance and will not tear.
- Our Sun Master® 6 mil 4 year clear film is made from strong copolymer resin with an anti-static additive that repels dust and dirt and keeps the light shining through. This film, with tri-layer construction and UV additives, offers 92% light transmission and comes with a 4 year warranty.
- Choose Roll-Up or Drop-Down Sides, manufactured from our 5.2 oz. fabric, to control the air entering the high tunnel and provide four-sided ventilation. Includes our exclusive "Twist-of-the-Wrist" Assembly, complete with all necessary hardware for installation.
- Roll-up doors, which utilize our Hand-Crank Assembly, and end panels are manufactured from 10 oz., 22 mil translucent fabric.
- 20'W units have 16'W x 10'H doors. 26'W and 30'W units have 20'W x 10'H doors.
- Purchase 4 x 4s locally to strengthen and finish off the ends.

GROWSPAN

- 4' rafter spacing.
- For additional strength and durability, particularly in heavy-snow areas, add our GrowSpan Gothic High Tunnel Support Kits or our Gothic High Tunnel Rafter Kits.
- 6' sidewalls provide additional, valuable growing space.
- Heavy Duty ground posts are included.
- Baseboards are required to attach Drop-Down Sides. Our Recycled Plastic Lumber, sold separately.
- The optional Flush Door Mounting Kit (115083) provides an ideal entryway for high tunnels that are 30'W and have Roll-Up Ends. The kit features a 36"W x 80"H polycarbonate door for optimum light transmission. Flange provides a tight seal, ensuring control over the high tunnel's environment.
- To comply with NRCS requirements, all 30'W Gothic Premium High Tunnels can be outfitted with a Five Part Rafter Kit.

ORDERING: GROWSPAN GOTHIC PREMIUM HIGH TUNNELS

GrowSpan Series 500 Tall High Tunnels offer superior ventilation and maximum usable growing space.

- 20'W, 24'W, 30'W and 35'W have a premium 2.375" OD, 16-gauge galvanized steel frame that ensures strength, durability and long life. The 42'W frame has a premium 3.50" OD, 14-gauge, galvanized steel frame.
- GrowSpan Series 500 Tall High Tunnels are covered with Sun Master® Pull-and-Cut Clear Greenhouse Film that offers 92% light transmission and repels dust and dirt to keep light shining through.
- Choose between Roll-Up and Drop-Down Side options that will allow you to better control the ventilation within the greenhouse. Both options include our exclusive "Twist-of-the Wrist" Assembly that comes complete with all necessary hardware.
- Roll-Up Sides are made of our 6 mil 4 year Greenhouse Film. Drop-Down Sides are manufactured from our 5.2 oz. Clear Greenhouse Fabric.
- 20'W and 24'W have three rows of purlins. The 30'W, 35'W and 42'W frame has five rows of purlins which are ideal for hanging baskets in nurseries and more.
- Rafter spacing: 6' for 20'W, 24'W, 30'W and 35'W frames; 4' spacing for the 42'W frame.
- 20'W greenhouses are 16'H, 24'W greenhouses are 16'6"H, 30'W greenhouses are 17'4"H, 35'W greenhouses are 18'H, 42'W greenhouses are 19'H.
- Heavy Duty ground posts are included with your greenhouse. Ground posts are made of 2.197" OD 10-gauge steel to provide exceptional support.
- Baseboards are recommended. Our Recycled Plastic Lumber, sold separately.
- Optional End Frame Kits, Doors, Post Driver, Roll-Up Ends and Support Packages are sold separately.

GrowSpan Series 500 Tall Greenhouses allow more overhead space for improved ventilation for healthy crop production. High sidewalls mean maximum usable growing space, too.

- 20'W, 24'W, 30'W and 35'W have a premium 2.375" OD, 16-gauge galvanized steel frame that ensures strength, durability and long life. The 42'W frame has a premium 3.50" OD, 14-gauge, galvanized steel frame.
- GrowSpan Series 500 Tall Greenhouses are covered with double-layer film. This film is manufactured using an outer layer of our Sun Master® 6 mil 4 year Greenhouse film and an inside layer of our Sun Master® Infrared Anti-Condensate Thermal Film that maximizes heat retention and offers excellent drip control.
- Choose between Roll-Up and Drop-Down Side options that will allow you to better control the ventilation within the greenhouse. Both options include our exclusive "Twist-of-the-Wrist" Assembly that comes complete with all necessary hardware.
- Roll-Up Sides are made of our 6 mil 4 year Greenhouse Film. Drop-Down Sides are manufactured from our 5.2 oz. Clear Greenhouse Fabric.
- 20'W and 24'W have three rows of purlins. The 30'W, 35'W and 42'W frame has five rows of purlins which are ideal for hanging baskets in nurseries, garden centers and more.
- Rafter spacing: 6' for 20'W, 24'W, 30'W and 35'W frames; 4' spacing for the 42'W frame.
- 20'W greenhouses are 16'H, 24'W greenhouses are 16'6"H, 30'W greenhouses are 17'4"H, 35'W greenhouses are 18'H, 42'W greenhouses are 19'H.
- Heavy Duty ground posts are included with your greenhouse. Ground posts are made of 2.197" OD 10-gauge steel and provide exceptional support.
- Baseboards are recommended. Our Recycled Plastic Lumber, sold separately, is ideal.
- Optional End Frame Kits, Doors, Post Driver, Roll-Up Ends and Support Packages are sold separately.

These greenhouses are suitable for the backyard hobbyist or the professional grower. The twin-wall polycarbonate covering provides strength, durability and elegance. Clear sheets are flame retardant, will not discolor and have up to 78% light transmission.

- Frame is manufactured from highest quality USA-made, triple-galvanized structural steel tubing.
- End frame is constructed from strong 16-gauge, 1.5" square USA-made, triple-galvanized structural steel tubing.
- Ends and top covering are constructed from our 8 mm twin-wall polycarbonate sheets that are light in weight, virtually unbreakable and come with a 10 year warranty.
- Panels contain UV inhibitors which prevent degradation.
- Built-in condensate control eliminates water droplet formation for a healthier plant environment.
- Units come equipped with a 36"W x 80"H Heavy Duty aluminum entry door, complete with 6 mm polycarbonate sections at both top and bottom, stainless steel hinges and latch.
- 4'H sidewall offers more valuable growing space.
- Optional Double Door Kits sold separately.
- Heavy Duty ground posts are included. Baseboards are recommended. We recommend our Recycled Plastic Lumber, sold separately.
- Save hundreds of dollars on equipment and accessories when you purchase the Greenhouse System. We've done all the calculations for you. The size and quantity of items are determined by the size of your greenhouse.

Optional Single Door Kit

- Includes 36"W x 80"H door, complete with stainless steel hinges and latch and all necessary hardware for installation.

Optional Double Door Kit

- Includes heavy-duty double doors, each 48"W x 92"H, stainless steel hinges and latch and all necessary hardware for installation. Double Door Kit not for use with 14'W Greenhouses.

GROWERSSUPPLY.COM

GROWSPAN

GrowSpan Gothic Pro Greenhouses and Systems are available with Solid Polycarbonate, Greenhouse Film with Roll-Up or Drop-Down Sides or Polycarbonate with Roll-Up or Drop-Down Sides.

- Frame is constructed from highest quality USA-made, triple-galvanized structural steel tubing.
- End frame is constructed from strong 16-gauge, 1.5" square USA-made, triple-galvanized structural steel tubing.
- Available in Gothic Style with Polycarbonate Ends and Film Top with either Roll-Up or Drop-Down Sides, Polycarbonate Ends and Tops or Polycarbonate Ends and Tops with either Roll-Up or Drop-Down Sides.
- All greenhouses come with polycarbonate gable ends.
- Drop-Down Sides use our 5.2 oz. greenhouse fabric.
- 8 mm twin-wall polycarbonate provides superior insulating qualities, offers reduced heating costs and comes with a 10 year warranty.
- "Twist-of-the-Wrist" Roll-Up or Drop-Down Sides make ventilation easy.
- Double-layer film covering, with Inflation Fan Kit, is manufactured using an outer layer of our Sun Master® 6 mil, 4 year Greenhouse Film and an inside layer of our Sun Master® Infrared Anti-Condensate Thermal Film that maximizes heat retention and offers excellent drip control. Poly latches are included.
- Heavy-duty double doors are 48"W x 92"H each, and come complete with stainless steel hinges and latch. Optional Double Door Kit is also available.
- Heavy-duty ground posts are included.
- Baseboards are required for Drop-Down Sides. We recommend our Recycled Plastic Lumber, sold separately.
- For added strength and durability, especially in heavy snow areas, we recommend adding our Gothic-Style Support Packages, sold separately.

GROWSPAN GOTHIC PRO GREENHOUSE SYSTEMS INCLUDE

Commercial-Grade Exhaust Fan with Shutters

DuroStat™ NEMA 4 Dual Voltage Thermostat Controls heating and cooling from 30°F to 110°F.

ValuTek™ Horizontal Airflow Fan

Modine™ Power-Vented Greenhouse Heater*
*High Altitude Kit is required at altitudes over 2,000 ft.

ValuTek™ Motorized Heavy-Duty Aluminum Intake Shutters

ORDERING: GROWSPAN GOTHIC PRO GREENHOUSES AND SYSTEMS

For Greenhouse with Polycarbonate Ends and Roll-Up Film Sides add C to the end of the desired STK# (Example: 106306C).

For Greenhouse System with Polycarbonate Ends and Roll-Up Film Sides add SN (Natural Gas) or SP (Propane) to the end of the STK# to indicate your desired type of heater (106306SP).

For Greenhouse with Polycarbonate Ends and Drop-Down Fabric Sides add D to the end of the desired STK# (106306D).

For Greenhouse System with Polycarbonate Ends and Drop-Down Fabric Sides add SN (Natural Gas) or SP (Propane) to the end of the STK# to indicate your desired type of heater (106306DSP).

For Greenhouse with Solid Polycarbonate add PC to the end of the desired STK# (106306PC).

For Greenhouse System with Solid Polycarbonate add SN (Natural Gas) or SP (Propane) to the end of the STK# to indicate your desired type of heater (106306PCSN).

For Greenhouse with Polycarbonate and Roll-Up Film Sides add R to the end of the desired STK# (106306R).

For Greenhouse System with Polycarbonate and Roll-Up Film Sides add SN (Natural Gas) or SP (Propane) to the end of the STK# to indicate your desired type of heater (106306RSN).

For Greenhouse with Polycarbonate and Drop-Down Fabric Sides add DD to the end of the desired STK# (106306DD).

For Greenhouse System with Polycarbonate and Drop-Down Fabric Sides add SN (Natural Gas) or SP (Propane) to the end of the STK# to indicate your desired type of heater (106306DDSN).

GrowSpan Round Pro Greenhouses are energy efficient, economical and ideal for the professional grower or backyard hobbyist. Choose either the greenhouse alone or save hundreds of dollars and purchase the entire Greenhouse System. You get exactly the equipment you need for your size greenhouse.

- Frame is constructed from highest quality USA-made, triple-galvanized structural steel tubing.
- End frame is constructed from strong 16-gauge, 1.5" square USA-made, triple-galvanized structural steel tubing.
- GrowSpan Round Pro Greenhouse has polycarbonate ends and greenhouse film top covering.
- Available as stand-alone greenhouses or complete greenhouse systems.
- 8 mm twin-wall polycarbonate provides superior insulating qualities, offers reduced heating costs and comes with a 10 year warranty.
- Double-layer film covering, with Inflation Fan Kit, is manufactured using an outer layer of our Sun Master® 6 mil, 4 year Greenhouse Film and an inside layer of our Sun Master® Infrared Anti-Condensate Thermal Film that maximizes heat retention and offers excellent drip control. Poly latches are included.
- "Twist-of-the-Wrist" Roll-Up Sides make ventilation easy.
- Heavy Duty doors are 48"W x 92"H each and come complete with stainless steel hinges and latch. Optional Double Door Kit is also available.
- Heavy Duty ground posts are included with 20"W and 26"W units.
- Heavy Duty Base Plates, that can be used on any surface and come with predrilled fastening holes, are included with 38"W units.
- During extreme heat, we recommend our SunBlocker™ Black Knitted 60% Shade Panels, sold separately, to eliminate heat stress and to ensure optimum plant growth. Ask your National Account Manager for details.

GrowSpan Round Pro Greenhouse Systems include:

- Modine™ Corrosion-Resistant Vented Heater in natural gas or propane.
- Commercial-Grade Exhaust Fan with shutters.
- ValuTek™ Motorized, Heavy Duty Aluminum Intake Shutters.
- ValuTek™ Horizontal Airflow Fan.
- DuroStat™ NEMA 4 Dual-Voltage, Waterproof Thermostat.
- Please note that size and quantity of items are determined by the size of your greenhouse. Ask your National Account Manager for more details.

GROWSPAN GOTHIC PRO GREENHOUSE SYSTEMS INCLUDE

Commercial-Grade Exhaust Fan with Shutters

ValuTek™ Horizontal Airflow Fan

DuroStat™ NEMA 4 Dual Voltage Thermostat
Controls heating and cooling from 30°F to 110°F.

Modine™ Power-Vented Greenhouse Heater*
*High Altitude Kit is required at altitudes over 2,000 ft.

ValuTek™ Motorized Heavy-Duty Aluminum Intake Shutters

GrowSpan Pro Greenhouses offer you more valuable growing space. Purchase the greenhouse alone or save hundreds of dollars and purchase the entire GrowSpan Pro Greenhouse System.

- Frame is manufactured from highest quality USA-made, triple-galvanized structural steel tubing, with 4' rafter spacing.
- GrowSpan Round Pro Greenhouses the 1.315" OD with 17-gauge triple-galvanized structural steel tubing.
- GrowSpan Gothic Pro Greenhouses the 1.66" OD with 14-gauge triple-galvanized structural steel tubing.
- End frame is constructed from strong 16-gauge, 1.5" square USA-made, triple-galvanized structural steel tubing.
- Ends are covered with 8 mm twin-wall polycarbonate that offers superior insulating qualities and reduced heating costs and comes with a 10 year warranty.
- Heavy Duty ground posts are included.
- We do recommend using a baseboard. Our Recycled Plastic Lumber, sold separately, is ideal.
- Double-layer top covering, with Inflation Fan Kit, is manufactured using an outer layer of our Sun Master® 6 mil, 4 year Greenhouse Film and an inside layer of our Sun Master® Infrared Anti-Condensate Thermal Film that maximizes heat retention and offers excellent drip control.
- Gothic Style is available with either Roll-Up or Drop-Down Sides. Drop-Down Sides use our 5.2 oz. greenhouse fabric and come complete with our "Twist-of-the-Wrist" Assembly. Baseboards are required for drop-down sides.
- Units come equipped with a 36"W x 80"H heavy-duty, aluminum entry door, complete with 6 mm polycarbonate sections at both top and bottom, stainless steel hinges and latch.
- Optional Single Door Kit, sold separately.
- During extreme heat, use our SunBlocker™ Black Knitted 60% Shade Panels, sold separately, to eliminate heat stress and to ensure optimum plant growth.

GrowSpan Series 2000 Commercial Greenhouses are the solution to the demand for modernized vegetable, bedding plant and hydroponic production. Designed to provide the optimal growing environment, these structures feature an energy efficient 6/12 roof design.

- Choose between 20', 24', 30', 35', 41' and 50' widths. Heavy Duty Base Plate and ground post mounting options are available, depending on your needs.
- Extra-tall 10' side walls provide maximum usable space.
- Peak-roof design allows ventilation during almost all weather conditions. Optional end vent kits are also available for added ventilation. Ask your greenhouse specialist for details.
- 6/12 roof design minimizes snow, ice and water buildup and increases air flow for a more comfortable production environment.
- Energy-saving 8 mm polycarbonate roof, sides and end walls are impact and UV-resistant.
- End Frame Kits are sold separately below, along with End Cladding Kits, available in 8 mm Twin-Wall Polycarbonate or Corrugated Polycarbonate.

To indicate your desired anchoring method, add G for Ground Posts or B for Heavy Duty Base Plates to the end of the STK#.

Reliable, low-maintenance Power Vent System includes durable rack and pinion setup for automated greenhouse ventilation.

- Ideal for new greenhouses, our Power Vent System can be customized for any size side, roof or end wall vents.
- Manufactured from high-quality components for long-lasting use.
- Single phase 115 V motor features a self-braking, worm-drive transmission and a patented integrated linear limit switch system.
- Make your system complete with one of our Link4 iGrow Controllers, sold separately.
- We offer all the components you need to create a custom vent system for your greenhouse. Call one of our greenhouse specialists to design your system today.

GREENHOUSE POWER VENT SYSTEM

Customize the ideal gutters for Arch-Type and A-Frame Greenhouses with our gutter components and accessories.

- Manufactured from durable 12-gauge galvanized steel.
- Gutter Saddles ensure secure installation of gutters to roofs.
- Two gutter types available: with or without downspout.
- Install your gutter system with our Drip Gutters to collect condensation from gutter undersides. Drip Gutters are available in two lengths and are manufactured from 6063-grade aluminum.

GrowSpan's Series 750 Commercial Greenhouse is an industry game changer. This structure features a fully automated light deprivation system at a price point operations can't ignore.

GrowSpan Blackout System:

- Cost-effective automated light deprivation has never been this simple. This light dep system sits on a substructure within the greenhouse, and when in use, the blackout material ascends to the building's peak, creating total darkness in a matter of moments.
- The light deprivation system is cable driven and designed with fewer parts, so installation and maintenance are easier than traditional systems.
- The system is completely internal, so it's not susceptible to damage from wind or the elements.
- Optional Series 750 Equipment Packages are available.
- The greenhouse is manufactured with galvanized steel and designed for strength and resilience. Each structure can be engineered upon request for up to 25 psf ground snow load, 12 psf live load and 105 mph wind speed.
- Greenhouses are available at 32'W at a standard width, blackout width of 30' and lengths of 48', 72', 96' and 120'. It features a 16'H peak, 7'H sidewalls and a 6.3:12 roof pitch.
- Covered with inflatable film for improved insulation. End walls are white-black-white polycarbonate to provide superior energy efficiency and a clean, professional look.
- Includes Plyco double door.
- Option of lumber baseboard or galvanized steel baseboard. Lumber baseboard sold separately. The Series 750 comes with hardware for lumber baseboard. Galvanized steel baseboard option does include the steel baseboard.

Series 750 Equipment Packages

- GrowSpan's Greenhouse Specialists have already sized out these packages, so growers are ensured to get the proper setup for their GrowSpan Series 750 Commercial Greenhouse.
- Equipment packages include two exhaust fans with centrifugally activated shutters and low-profile light traps, an evaporative cooling system and end wall vent with white-black-white cladding and horizontal airflow fans with hanging equipment.
- Evaporative Wall is 4' x 19".

Mounting equipment in your GrowSpan Series 750 is a simple task with this Equipment Mounting Kit.

- This kit is great for mounting addition lights, circulation fans, wiring conduit and much more.
- Each kit contains a 2 x 2 square chord and hardware that spans the internal rafters and is suspended from the peak of the 6 x 6 main structure by a threaded rod.
- The equipment mounting height is approximately 9' above ground level.
- Maximum recommended weight per chord is 150 lbs.

GrowSpan Series 500 Tall Cold Frames, with 6'H sidewalls, provide maximum usable growing space and increased overhead space for great ventilation.

- Premium 2.375" OD 16-gauge galvanized steel frame ensures strength, durability and long life.
- Cover with fabric of your choice, sold separately.
- Rafter spacing is 6' for 20'W, 24'W, 30'W and 35'W frames; 4' spacing for the 42'W frame.
- Sidewall height is 5'.
- 20'W cold frames are 16'H.
- 24'W cold frames are 16'6"H.
- 30'W cold frames are 17'4"H.
- 35'W cold frames are 18'H.
- 42'W cold frames are 19'H.
- Heavy Duty ground posts are included with your cold frame. Ground posts are made of 2.197" OD 10-gauge steel to provide exceptional support.
- Baseboards are recommended. Our Recycled Plastic Lumber, sold separately, is ideal, or purchase lumber of your choice locally.
- Optional End Frame Kits, Doors, Ridge Vent Kits, Roll-Up Ends and Support Packages are available.
- Optional Post Driver, for easy installation, sold separately.

GrowSpan Straight Sided Cold Frames provide a comfortable growing environment.

- Encourages better air circulation, with less humidity and more stable air temperature.
- Constructed from 14-gauge, USA-made, triple-galvanized structural steel tubing.
- 20'W models have a 4'6" sidewall height and a 9'6" height at peak.
- 28'W models have a 4' sidewall height and an 11' height at peak.
- Ground posts and purlins included.
- Can be covered with greenhouse film, shade cloth or lightweight PolyMax® fabric, all sold separately. 20'W requires 32'W film. 28'W requires 42'W film.
- Top and bottom baseboards are recommended. Our Recycled Plastic Lumber, sold separately, is ideal.

Expand your existing Cold Frame with one of our Cold Frame Rafter Kits. Any length, any spacing. Gain additional, valuable growing space.

- Rafter Kits add extra strength and durability, particularly in heavy-snow areas.
- Kits come complete with two ground posts.
- Simply add purlins and cross connectors, sold separately, as needed.

Rafter Kit Accessories

- Universal swaged purlins are manufactured from 17-gauge, USA-made, triple-galvanized structural steel tubing and are corrosion resistant.
- 1.315" OD, 1-3/16" ID, 3" swage.
- Unique aluminum universal cross connectors are ideal for purlin-to-rafter connections and will add strength to your greenhouse.

GROWERSSUPPLY.COM

GROWSPAN

Ideal for starting seedlings or transitioning greenhouse plants prior to outdoor planting.

- Easy to assemble; no drilling or welding.
- Frame is manufactured from heavy-gauge, USA-made, triple-galvanized structural steel tubing.
- 4' rafter spacing.
- Two styles to choose from, Gothic or Round.
- Gothic style has 4'H side walls. For added strength and durability, especially in heavy-snow areas, we recommend adding our Gothic-Style Support Packages, sold separately.
- All units come complete with ground posts.
- Baseboards are recommended. Our Recycled Plastic Lumber, sold separately, is ideal.

GrowSpan Economy Cold Frames

- Choose from a large selection of frame widths and lengths.
- Frames are made from 19-gauge, 1.05" OD USA-made, triple-galvanized structural steel tubing, with 5' rafter spacing and one purlin.
- Extra rafter kits are available, as well as pipe for additional purlins.
- To provide stability and durability for your frame, we recommend using our Recycled Plastic Lumber for upper and lower baseboards. UV stabilizers protect this lumber and it will not rot, split, crack or splinter. Sold separately.
- Available frame only or choose frame with 6 mil 4 year greenhouse film, just like the professionals use. Film contains UV block, which helps to reduce the harmful effects of ultraviolet radiation while providing a more comfortable working environment, and an anti-dust additive for better film clarity over the life of the covering. 8' single U-Channels and Stainless Steel Springs are included with purchase of Cold Frame with Film to provide a professional, finished appearance (not included with frame-only option).
- Ground posts and post driver are included for anchoring.

Get your family growing today or give your small business a boost with the GrowSpan Hydroponic & Gothic Greenhouse Package. With this package you'll be able to grow everything from large vine crops, like tomatoes or cucumbers, to smaller herbs, like basil and parsley.

The GrowSpan Hydroponic & Gothic Greenhouse Package comes with some of our most popular hydroponic products.

- If you like tomatoes, peppers, eggplant or other vine crops, you'll love the two HydroCycle H2-4 Micro Dutch Bucket Systems that we've included.
- There's also a HydroCycle 4" Pro NFT Lettuce System to grow green and leafy lettuce. These systems are great for hobbyists and commercial growers alike.
- You'll also find a 4' x 8' and 4' x 4' Propagation Float Station. The larger station has been used with success for growing pac choi, swiss chard, kale and more, while the smaller is great for fresh herbs, like basil, parsley, cilantro and more.
- We've also included a 2' x 8' Low Tide Tray that is great for seed propagation.
- With all of the plants you'll cultivate, you'll need a workspace and place to keep things organized and for this there are two 2' x 8' PolyMax® Benches.

You'll also have the option of including the GrowSpan Gothic Pro Greenhouse System.

- HeatStar Blue Flame Heater that comes in a model that runs on propane or one that runs on natural gas. Heater is not for use at altitudes above 4,500'. Cannot be sold in California. In Massachusetts, must be installed in compliance with CMR 248.
- ValuTek™ Direct Drive Exhaust Fan with Shutters promotes air quality and helps to remove condensation.
- DuroStat™ NEMA 4 Dual-Voltage Thermostat is an easy-to-use thermostat that allows you to keep your greenhouse at the proper temperature.
- ValuTek™ 12" Combo Air Circulation Fan is ideal for hanging from purlins in your greenhouse and promotes air circulation and quality.
- ValuTek™ Motorized Heavy Duty Aluminum Intake Shutters can be used with thermostatic controls or manually and it helps to keep fresh air within the greenhouse.
- Net Pots are sold separately and Float Rafts can be sourced locally.

These packages can be housed in your choice of GrowSpan Gothic Pro Greenhouses or GrowSpan Gothic Premium Greenhouses.

- The GrowSpan Gothic Pro Greenhouse is covered by double-layer Sun Master Greenhouse Film and is available with Roll-Up or Drop-Down sides.
- Our GrowSpan Gothic Premium Greenhouse is covered with polycarbonate for strength and durability.

Recycled Plastic Lumber is the environmentally-friendly and maintenance-free choice for your next building project.

- Perfect for use in construction of tables and benches, fencing, raised beds and sand boxes.
- Extremely durable. Will not rot, split, crack, splinter or need to be replaced after time like real wood. No need for painting, staining or waterproofing.
- Color goes through the entire piece and is protected by UV stabilizers, so there is no dramatic fading after exposure to the elements.
- Can either be nailed or screwed.
- For best results please predrill holes at least one size bigger.
- Color: Black.

Prevent heat buildup and produce healthier plants in your greenhouse by reflecting heat and light with Reflective Shade.

- Reduce plant stress and improve the efficiency of your greenhouse ventilation system.
- Manufactured from coextruded white/white polyolefin film, Reflective Shade features a monofilament yarn structure for strength and long-lasting use without significant stretching. 60% shade is black/white.
- Provides solar reflection and cooling, as well as heat retention.
- Highly reflective white side limits light and heat transmission for more efficient greenhouse shading during the day.
- Ideal for use with our Heat Retention/Shade Screen Systems, sold separately.
- 5 year manufacturer's warranty.
- Can be bordered with tape and grommets for extra durability.
- Available in 30% to 60% shade.

Remarkable solution for connecting netting or shade material to cable.

- Strong and resilient, this reusable connector is designed to be used with even the heaviest weight material.
- Rounded borders prevent damage to netting or shade.
- UV resistant.
- Holds strong even in extreme weather conditions.

RADIAL NET CONNECTOR

STK#	EACH	100 & UP
110009	\$0.45	\$0.35

Industrial-Quality Super Straps

- 1,650 PSI tensile strength.
- Extreme weatherability.
- Passes low temperature brittleness test at -40°F.
- Silicone-kilned, hard-temper galvanized wire hooks, dry-wax coated for rust protection.

SUPER STRAPS

FA1415	31"	54"	1.95

The world's best tarp clip. Versatile clip is ideal for tarps, poly film, banners and more.

- This amazing fabric clip holds most materials up to 28 mil thick.
- Easy-to-use, slide-locking, grabs and holds the fabric, yet is puncture and tear safe.
- 9/16" diameter hole allows the clip to be tied to a rope or secured with bungees.
- 2-1/2" overall width.
- Long lasting. UV protected.
- Use with our Double Hook (110004), sold separately above.
- We recommend placing clips every 12" to 24".
- A screw is included for securing option.

Pull and Cut SunBlocker™ Knitted Shade

- Make your own panels.
- Great for “do-it-yourself” applications.
- Lightweight with high tensile strength.
- Can be cut without unraveling.
- Can be bordered with tape and grommets for extra durability.
- Highly resistant to UV degradation and temperature extremes.
- Effective odor barrier, as knitted panels capture the dust carrying particles that spread odor.
- Green Knitted 90% Shade is the number one choice for most nurseries and decorative agriculture applications. Attractive green color makes this shade ideal for greenhouses, hoop structures, patios, porches, entry ways, livestock and poultry buildings, even dog kennels.
- Available in Black 30% to 80% or Green 90% shade.
- When you custom order consider the application, percentage of shade needed, size (length x width) and finishes.

SunBlocker™ Flat-Top Shade Systems are an economical and efficient solution for your horticulture, recreational or livestock needs.

- Offers immediate relief from the sun for people, plants and animals.
- Frame is constructed from 14-gauge, 1.66" OD USA-made, triple-galvanized structural steel tubing that offers maximum rust and corrosion resistance.
- 8'H legs.
- Block size: 10' x 10'.
- Design your own system. 5-way fittings offer infinite expandability.
- Covers are manufactured from black knitted polyethylene shade fabric (your choice of 40% to 80%) that does not rot, mildew or become brittle.
- Shade panels are fastened to frames with our 8" Snugger Tie-Downs.
- Covers can be removed easily during "off season."
- Anchoring systems are available below. Ask your National Account Manager which system is best for your needs.

Let SunBlocker™ shield plants, people, animals and vehicles from harmful sun.

- Protect your profits. Shield tender young plants from sunscorch and windburn.
- Great as a carport and for outdoor events, too.
- Manufactured with 2.375" OD 14-gauge, USA-made, triple-galvanized structural steel tubing.
- Anchoring sold separately. Use ground posts for soil or Heavy Duty Base Plates for concrete.
- No-hassle, straightforward assembly.
- Design your own system. 5-way fittings offer infinite expandability.
- Choose black knitted polyethylene 40% to 80% shade cloth. Same low price for all.
- Available in 10'W x 10'H x 20'L and 20'W x 10'H x 20'L sections.
- High enough to keep heat out and allow equipment in.

These Commercial Shade Houses combine SunBlocker™ Shade Houses with Reflective Shade, so you can shield plants from damaging heat, maintaining their health and profitability.

- Provides a cool area through solar reflection.
- The white side of the shade is highly reflective, and it creates an efficient shading option by limiting light and heat transmission.
- When temperatures are low, the black side of the shade can help reduce radiated heat loss.
- Shade features a 5 year warranty for outdoor use.
- Available in 40% to 60% shade.
- Shade is held by USA-made, triple-galvanized structural steel frames that are durable and corrosion resistant.
- Structure provides enough height for heat to escape.
- Anchor Kits are available. Ask your National Account Manager for details.
- We can manufacture Shade Houses of any size.

GROWSPAN

Your profits are "made in the shade." Choose from Commercial and Backyard Shade Houses for immediate relief from the sun for plants, people and animals.

- Both Commercial and Backyard Shade Houses offer choice of shade cloth from 40% to 80% for tops, sides and gable ends.
- Frame is USA-made, triple-galvanized structural steel tubing, for maximum rust and corrosion resistance.
- If desired, vary density of shade cloth from section to section.
- All sizes are high enough to allow heat to escape.
- Top comes standard with Shade House. Side panels and gable ends are available.
- Shade covers are manufactured from knitted polyethylene fabric that does not rot, mildew or become brittle.

Backyard Shade Houses

- Sturdy 17-gauge, 1.315" OD USA-made, triple-galvanized structural steel frames.
- 10' rafter spacing for fast assembly and portability.
- Use for plants, shrubs, people and animals. Great for those hot-day outings.

Commercial Shade Houses

- Heavy-duty 14-gauge, 1.66" OD USA-made, triple-galvanized structural steel frames.
- 5' rafter spacing for extra support.
- Recommended for commercial growers to shield tender plants from the sun.
- Available up to 24' wide.

- Shade panels are fastened to frames with 8" Snugger Tie-Downs.
- Anchor kits are available. Ask your National Account Manager for details.
- We can manufacture any size Shade House.

HydroCycle 4" Pro NFT Series

HydroCycle Pro NFT Series Channels are popular because of their ease of use, unique design, efficiency and versatility. HydroCycle Channels are available in different sizes to accommodate all types of hydroponic growing. Whether you are producing flowers, tomatoes, cucumbers, capsicum, microgreens, zucchini, strawberries, lettuce, herbs or larger leafy crops, there is a HydroCycle Pro NFT Series Channel for your needs.

- Manufactured to NSF-certified specifications for growing edible produce.
- Constructed from UV-stabilized, recycled plastics for long life, and features capping that is nontoxic and NSF certified for safe use.
- Contoured base centralizes nutrient flow and contoured lids allow excess water to run off.
- Simple construction provides maximum aeration to the roots.
- Lids remain secure in all conditions, yet are easily removed for fast, efficient cleaning.
- 20 year manufacturer's warranty against defective workmanship.

The most unique feature of the HydroCycle Channels are the removable, snap-on lids that puts you in complete control of your system's yield. Unlike most hydroponic channeling, which is produced in a one-piece hollow channel with regular holes cut in the top, our removable lid means:

- You can grow crops like forage or turf in open channels without the lid.
- You can quickly and easily cut holes in the contoured lid that will maximize your yield. By using the appropriate nutrients and watering regimes, you can bring your crops to maturity in minimum time frames.
- 4" Lids are 1.5"D and have 1" predrilled square holes, 8" on center. Lids have to be matched with the properly sized channel.
- 6" Lids are not predrilled.
- You have the option to grow different crops throughout the season by simply purchasing additional lids and changing them for your next crop cycle.
- Custom lids are available with a minimum order of 20,000 linear ft. Choose 1", 1.5", 2" or 2.5" holes with a minimum spacing of 4" on center. Ask your knowledgeable HydroCycle specialist for details.

HydroCycle 4" Pro NFT Series: 4"W x 1.5"D

Narrow, shallow channel is suitable for smaller-leafed varieties, such as herbs, "fancy" lettuce and more. Lids, Joiners and End Caps sold separately.

HydroCycle 6" Pro NFT Series: 6"W x 2.5"D

Ideal for "fancy" lettuce, herbs and other smaller-leafed varieties. Lids, Joiners and End Caps sold separately.

HydroCycle 9" Pro NFT Series: 9"W x 3"D

Versatile channel is suitable for large pots and ideal for the production of flowers, microgreens and animal fodder. End Caps sold separately.

Schedule 40 PVC Fittings, 1" x 1" SP x S Elbow (WF6682 & 111045)

- Use to connect End Cap w/Outlet to drain manifold.
- NSF certified.

HydroCycle 9" Pro NFT Deep Series: 9"W x 4"D

These extra-deep channels are ideal for tomatoes, capsicum, cucumbers and more.

HYDROCYCLE NFT HYDROPONIC CHANNELS

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Grow lettuce, herbs and other small leaf varieties in the HydroCycle 4" Commercial NFT Lettuce System. The system is constructed from UV-stabilized, recycled plastics for a long life, and the high-density design allows growers to increase yields by up to 33%.

- The durable NFT System is constructed from galvanized steel and provides plenty of support for the growing channels, hardware and crops. The easy-to-assemble frame features a compact design to maximize space, and it also makes it easy to transport trays from nursery to finishing.
- Using a 2-2-2 production cycle, growers can harvest 25% of the systems' lettuce sites each week.
- A nutrient supply system provides a maximum efficiency pump and plumbing kits that come complete with NSF-Rated PVC plumbing and fittings, white micro-tubing feed lines, valves, filter, hardware and 4" drain return system.
- Nutrient Mixing Tanks are crafted from FDA-approved resins to ensure safe storage of potable water. Meets specific gravity of 1.5 or 12.5 lbs. per gallon at 73°F. Light penetration is limited by green color, reducing algae growth. USA-made and comes with 3 year warranty from date of manufacture.

Nutrient Feed Tank and Pump Station.

Start hydroponic growing the easy way with HydroCycle Pro NFT Lettuce Systems. All components are specially designed or selected to create an ideal, complete NFT system for leaf/bib lettuce, herbs and more.

- Designed for a six-week grow cycle of leaf lettuce. Produce maximum yields in a small system footprint.
- Channel lids have up to eighteen 1-3/8" site holes, spaced 8" on center. Channels and lids are constructed from UV-stabilized, recycled plastics that are capped with NSF-certified material. Removable, snap-on lids provide easy system maintenance with minimal downtime.
- Table frame is manufactured from 1.315" OD USA-made, triple-galvanized steel for long life in corrosive environments.
- Systems come complete with nutrient reservoir tank, Magnetic Drive Pump for nutrient solution recirculation, Air Pump with Air Stone and all the necessary plumbing, fittings, adapters and more.
- Expect a yield of up to 2,340 heads per year with the 110830 or 113540 System and 4,680 heads per year with the 112251 or 113541 System.
- 112525 and 113539 are designed for a six-week grow cycle, with an average weekly yield of up to 12 heads of lettuce. Manageable systems for garden herbs, leafy greens and many lettuce varieties.
- 6" Pro NFT Channels lids are blank and do not come with predrilled holes. The number of lettuce sites suggested are with holes drilled 8" on center.
- We recommend our Growers Supply Greenhouse Light Fixtures, line of nutrients and Grodan A-OK Starter Plug Sheets, all sold separately.

PERFECT FOR HOBBY AND COMMERCIAL GROWERS ALIKE

Small system footprint ideal for setup in garages, basements, hobby greenhouses and more. Earn extra money growing high-quality lettuce and herbs in your home.

HydroCycle 8' Vertical Aeroponic System

HydroCycle 8' Vertical Aeroponic Hobby System

HydroCycle Vertical Aeroponic Systems utilize unique grow tubes that support the flow of oxygen for rapid growth and a nutrient-rich mist for healthy plants.

- These compact systems are ideal for growth in tight spaces and maximum control of the root zones.
- Aeroponics deliver a high-pressured mist that delivers nutrients to the root zone.
- The 10" tube diameter gives the root zone maximum aeration that helps the plants to grow quickly.
- Each system comes with an air pump with ceramic air diffusers, Y-fit snap hook tube hangers, all the necessary plumbing and fittings and more depending on the system that is purchased.

HydroCycle 4'8" Vertical Micro Aeroponic System

- Approximately 20"W x 26"L x 73"H.
- Uses a single vertical grow tube that is 4'8"H and has 24 grow sites.
- System comes with a mag-drive pump and a 20-gallon nutrient reservoir.

HydroCycle 4'8" Vertical Mini Aeroponic System

- Approximately 29-1/2"W x 96"L x 75"H.
- Uses 5 vertical grow tubes that are 4'8"H and contain 24 grow sites per tube (120 total sites).
- System comes with a pressure utility pump and a 100-gallon nutrient reservoir.

HydroCycle 8' Vertical Aeroponic Hobby System

- Approximately 28"W x 39"L x 124"H.
- Uses a single vertical grow tube that is 8'H with 44 grow sites.
- System comes with a pressure utility pump and a 20-gallon nutrient reservoir.

HydroCycle 8' Vertical Aeroponic System

- Approximately 29-1/2"W x 96"L x 115"H.
- Uses 5 vertical grow tubes that are 8'H with 44 grow sites per tube (220 total sites).
- Comes with a pressure utility pump and a 100-gallon nutrient reservoir.

WARNING: Cancer and Reproductive Toxicity • P65Warnings.ca.gov

The HydroCycle Hobby NFT Lettuce Systems produce lush, healthy produce on a year-round basis. These compact systems are an ideal option for the hobbyist looking to earn extra income from home or just grow fresh produce, the commercial grower trying to experiment with new crops or school agricultural programs.

- Consistently produce the tastiest and most profitable lettuce, herbs, leafy greens and more.
- The six week grow cycle allows each system to produce an average weekly yield of up to 12 heads of lettuce.
- Hobby Systems feature a small footprint that allows it to be effortlessly operated in garages, basements, hobby greenhouses, schools and more.
- Each channel is recommended to have seven 1-3/8" plant sites, which are spaced 8" on center, providing a total of 28 plant sites per system.
- Systems with 4" W Channels come with lids that have been predrilled.
- Channels and lids are constructed from UV-stabilized, recycled plastics that are capped with NSF-certified material. The removable, snap-on lids provide easy system maintenance.
- The frame is manufactured from 1.315" OD USA-made, triple-galvanized steel, providing a long life in even the most corrosive environments.
- Systems come complete with nutrient reservoir tank, magnetic drive pro pump, air pump with air stone, as well as all the necessary plumbing, fittings and adapters.

Grow lush, green lettuce and herbs hydroponically, no matter how small your space is. The four-tier HydroCycle Vertical NFT Lettuce and Herb Systems have a small footprint, allowing more growth in less space.

- Systems are available in 10' and 5' lengths with the option of twenty-four 4" Pro NFT channels or twenty 6" Pro NFT channels.
- On the 10' system using a six week cycle, growers are able to easily produce up to 4,680 healthy and profitable heads per year.
- 4" Pro NFT Systems come with lids that have been predrilled, while the 6" Pro NFT Systems come with lids that have not been drilled.
- Systems come complete with all the necessary components. The 10' system features a 115-gallon reservoir tank, while the 5' system has a 70-gallon reservoir tank, and both come with drain plumbing, an energy-efficient continuous duty pump, fittings and adaptors.
- To promote a high-quality yield, Gordan A-OK Starter Plugs, Botanicare® Nutrients and testers are recommended.

Light Kit

- HydroCycle designed light kits provide Vertical NFT Systems with even and effective lighting.
- Includes 6,500 K and 3,000 KT-5 full spectrum bulbs.
- Does not include wiring, junction boxes or timers.
- Light Kits are sold separately below and need to be installed by a licensed electrician.

HydroCycle Aquaponics Systems provide you with the opportunity to tap into two markets. While harvesting healthy vegetables, you can also raise valuable fish.

- Systems integrate both hydroponic growing systems and fish-producing aquaculture tanks.
- Aquaponics systems allow you to take advantage of essential biological functions. The fish fertilize the plants while the plants purify the water, leading to low-maintenance, cost-effective systems.
- Produce natural, pesticide-free products.

HydroCycle Pro Aquaponics Systems

- Systems ensure constant clean water for fish and plants. A two-stage filtration system maintains fresh water and utilizes a radial flow clarifier and a mineralization tank.
- The Pro System uses only one pump, so less energy is required compared to similar aquaponics systems.
- Systems come complete with all the necessary tanks, hardware and aeration supplies.

HydroCycle Commercial Aquaponics Systems

- This is the perfect professional system. It produces a steady stream of profitable fish and crops all year.
- Includes a grow-out system that uses a Hydrotech drum filter for solids removal. It is fully automated and utilizes gravity, minimizing the need for pumps and electricity.
- Systems come with a fingerling system for bioclarification and filtration. The fingerling system performs solids removal and some biofiltration. They are self cleaning, so they require minimal maintenance.
- Commercial Aquaponics Systems include all the necessary tanks, hardware and aeration supplies.

Pro System I (115295)

- Features an 8' x 8' raft bed.
- 168 lettuce sites.
- Can produce 90 lbs. of tilapia yearly.

Pro System II (115296)

- Features an 8' x 16'1" raft bed.
- 336 lettuce sites.
- Can produce 180 lbs. of tilapia yearly.

Pro System III (115297)

- Features an 8' x 24'3" raft bed.
- 504 lettuce sites.
- Can produce 288 lbs. of tilapia yearly.

Pro System IV (115298)

- Features an 8' x 32'5" raft bed.
- 672 lettuce sites.
- Can produce 520 lbs. of tilapia yearly.

Commercial System V (112667)

- Features two 8' x 48'8" raft beds.
- 2,016 lettuce sites.
- Can produce 4,000 lbs. of tilapia yearly.
- 128 sq. ft. of additional growing space.

HYDROCYCLE

For beginning growers or professionals, the HydroCycle 9" Pro Microgreen Table provides the freshest and tastiest microgreens at the highest yields.

- The system utilizes a recirculating nutrient film technique (NFT) and allows for live-plant harvest and storing the greens with roots intact.
- Easy assembly, as well as less system maintenance, labor and waste compared to conventional growing.
- HydroCycle 9" Pro Microgreen Table provides 11-1/4 sq. ft. of growing space. Pea and sunflower shoots can yield 13 oz. per sq. ft. every 10 days, while mizuna, arugula, chard, beet and more can yield up to 6 oz. per sq. ft. every 14 days.
- 20 year warranty on the UV-stabilized, NSF-certified NFT channels.
- Recommended accessories: Heavy-Duty Digital Timer (112531), TNB pH Down (116432), Botanicare® CNS17™ Grow 3-1-2 (112908) and Waterproof pH/EC/TDC/°C Meter for Growers (108251).

HYDROCYCLE 9" PRO MICROGREEN TABLE

STK#	EACH
113532	\$1,139.00

Provide your local market with fresh microgreens on a continuous basis. The HydroCycle Pro Vertical Microgreen System allows beginners or professionals to produce high yields of these in demand greens with ease.

- HydroCycle Pro Vertical Microgreen Systems utilize a recirculating nutrient film technique (NFT). This allows growers to harvest living plants with roots intact, making it easier to supply customers with the freshest greens.
- Systems are outfitted with 16 large 9" NFT channels.
- Assembly and maintenance is simple. Compared to conventional growing, growers will experience reduced labor and waste, allowing harvests to be more profitable.
- Achieve high yields within a limited square footage. Pea and sunflower shoots can yield up to 13 oz. per sq. ft. every 10 days, while mizuna, arugula, chard, beet and more can yield up to 6 oz. per sq. ft. every 14 days.
- Features a 20 year warranty on the UV-stabilized, NSF-certified NFT channels.
- Recommended accessories: Heavy Duty Digital Timer (112531), TNB pH Down (116432), Botanicare® CNS17™ Grow 3-1-2 (112908) which are sold on pgs. 64-65 and Waterproof pH/EC/TDC/°C Meter for Growers (108251). Accessories are sold separately.

Easily produce kale, swiss chard, herbs, lettuce and more on a year-round basis.

- These systems suspend roots in nutrient-rich water. This allows growers to fine-tune the solution to their plants' precise needs, ensuring the finest harvests.
- Maximize production, without overcrowding crops. Growers are able to layout the raft bed to best suit their needs. Plant sites can be arranged to provide plants with the perfect amount of space.
- Durable raft is made to last in any growing environment. The frame is constructed from 16-gauge, square steel pipe. The rafts are made from 1-1/2" Styrofoam, which also provides insulation. The bed is lined with 24 mil PolyMax®.
- The Raft Bed has a depth of 12.5" and is available in six sizes up to 56'8" long.

HYDROCYCLE RAFT BEDS

115335	8' x 56'8"	8,249.00

The new Propagation Float Station provides a constant circulation of Aerated Nutrient solution to the raft float that is great for various plants and works especially well for propagating seedlings that need extended roots for Deep Channel Hydroponics.

- Allows for large root masses in plants, like tomatoes, cucumbers and eggplant, to grow long enough to reach the nutrient flow.
- Can also be used as a standard raft system to grow lettuce, Swiss chard, pac choi and more.
- Constant recirculation provides: constant mixing of solution to help prevent nutrient settlement, maximum aeration within the tank to not disturb root zones, more stable water temperatures and easy nutrient solution maintenance and testing.
- System includes: efficient and potable water safe magnetic drive recirculation pump, two outlet air pumps with stones and tubing, strong, 16-gauge, galvanized, square steel tubing frame with height adjustable feet for leveling, float tray, nutrient tank, bulkhead fittings and spacers and supply and drain tubing with flow control valves.

Get your propagation tray moving. Quickly transport and transplant seedlings and plants, so that you can spend less time preparing and more time growing.

- 48"W x 96"L grow bench and tray on casters allows your propagation tray to glide throughout your growing space.
- The frame is made from corrosion-resistant, galvanized steel tube and is strong enough to hold 1,000 lbs. when stationary or 300 lbs. while moving. Frame can be easily assembled on site.
- To accommodate taller plants and grow lights there is an optional Trellis and Light Bar frame (113205).
- Bulbs sold separately.

For those looking to grow hydroponically within the home or in compact spaces, we offer the HydroCycle Micro Dutch Bucket System. Its modest footprint means that it can fit in just about any space.

- With dimensions of just 39"W x 35"L x 12"H, this is an ideal system for home growers or hobbyists.
- Great for growing vine crops, like tomatoes or cucumbers, and also peppers, eggplant and more.
- The Micro System includes four HydroCycle Dutch Buckets with siphon elbows, 3/4" supply tubing, 1/8" micro tubing, dripper stakes, micro tees, magnetic drive recirculating pump, air pump with air diffusers and a nutrient reservoir with lid and porthole cover.

HYDROCYCLE MICRO DUTCH BUCKET SYSTEM

STK#	ITEM	EACH
113621	H2-4	\$579.95

Available in tan only.

Our HydroCycle Whole Bay Dutch Bucket Systems simplify large-scale growing and allow you to hydroponically grow healthy and attractive plants.

- To grow the finest crops, this system utilizes concentrated fertilizer and nutrient solutions.
- The system mixes water in two tanks of fertilizer and then a Nutrient Batch Dosing System adds acid to maintain the proper pH.
- Woodpecker drippers and dripper stakes use a nutrient feed pump station to provide the plants with a nutrient solution. In order to prevent disease, any excess nutrient solution is treated as waste and drained.
- Each bucket has a siphon-designed drainage system and nutrient reservoir.
- Our production specifications are based off of tomato plants that are planted two per bucket with the buckets spaced 16" on center. Nutrients, spacing and watering can change based on plant type or variety.
- HydroCycle Dutch Bucket Row Kits allow growers to add a row of buckets to our existing systems.

Available in tan only.

Complete HydroCycle Dutch Bucket Systems do all the work for you. Systems come complete with all the components necessary to start growing hydroponically.

- Tan, 11-Liter HydroCycle Dutch Buckets are durable and long-lasting.
- Easy Drain Reservoirs and Lids are BPA free and come with the systems.
- Heavy-Duty Digital Timers are ideal for worry-free operation.
- All plumbing accessories are also included.
- HydroCycle H1-10 System is ideal for the hobby grower. It comes with one row of ten Dutch Buckets and is a closed loop system.
- HydroCycle H2-24 System is a larger hobby growing system. It is made up of two rows of twelve Dutch Buckets and is an open system.

If you're tired of bending over to tend to your Dutch buckets, you'll love these benches. The Dutch Bucket Low Profile Bench lifts your buckets to the perfect height, but its list of uses doesn't end there.

- Benches come with optional leveler feet that can add height to the bench and enable you to slope the bench.
- Great for any greenhouse need that requires a low-profile bench; you can create your own tiered display, display taller plants at eye level and more.
- Made from galvanized, 1.5" steel tube and galvanized expanded metal. The benches have been constructed without welds to reduce the risk of corrosion.

HydroCycle's versatile Dutch Buckets are ideal for both small- and large-scale hydroponic growing.

- HydroCycle Dutch Buckets are designed to be fed by drop emitters and plumbed to drain using a common 1.5" PVC pipe, purchased locally.
- Siphon Elbows, sold separately, regulate safety reservoir or nutrient solution at the bottom of the bucket to 1" deep. This feature prevents growing media from drying out and causing water stress between irrigation cycles. The Siphon Elbow prevents over accumulation of nutrient solution.
- Each Dutch Bucket requires two Siphon Elbows, sold separately below.
- Available in tan only.
- Your knowledgeable National Account Manager can help you design the best HydroCycle Dutch Bucket system for your needs with our recommended accessories. Our growing media and complete line of drip irrigation components are sold separately.

HydroCycle Dutch Bucket Accessories

Horticultural Perlite (111049):

Lightweight Perlite supports roots without crushing them. Provides aeration and drainage, yet retains and holds substantial amounts of water that is released when needed. One 4 cu. ft. bag will fill approximately eight of our 11-Liter HydroCycle Dutch Buckets.

Grodan A-OK Starter Plug Sheet (111386):

Ideal for starting seeds and cuttings before transferring to Grodan Delta Gro-Blocks™. Ninety-eight 1.5" x 1.5" starter plugs per sheet.

Grodan Delta Gro-Blocks™ (111387 and 111388):

Sterile, lightweight and easy to use. Delta 4 Blocks each measure 3" x 3" x 2.5" and are ideal for smaller plants such as peppers and flowers. Delta 6 Blocks each measure 4" x 4" x 2.5" and are ideal for larger, fruiting crops such as tomatoes and cucumbers. Priced per strip.

1/8" SuperFlex™ UV White Polyethylene Tubing (110408A):

Ideal for use with drippers, dripper stakes and more. Sold only in 100' increments or full 1,000' rolls. Full 1,000' rolls are priced per ft.

Angled Arrow Dripper Stakes (110403 and 110407):

Available in 3-3/4"L and 6-3/8"L. Applying water directly to the growing media helps prevent the spread of diseases and creates a uniform, high-quality crop. Priced per stake with a minimum order quantity of 10 stakes.

HydroCycle Dutch Bucket Lids (115683):

Dutch Bucket lids provide protection from light and debris. They also reduce algae growth and promote proper temperatures. Sold in pairs.

Seed Soaking and Sanitizing Systems for the Fodder-Pro Feed Systems are available in both single and double-tank styles, depending on your needs.

- Tanks are manufactured from impact and corrosion-resistant 3/16" polyethylene and can withstand most temperature extremes.
- Tanks are 27" deep and have an 18" diameter. Tank height is 38".
- Slippery surfaces on the inside of tanks allow for seeds to easily slide down to the bottom of the tank toward the drain at a 45° angle.
- Tanks come with 3" gate valves for easy transfer of seeds from the Seed Soaking and Sanitizing System to the seed transport.
- Frames are made of galvanized steel to support the 30-gallon tanks.
- Aeration components are included for superior seed treatment.
- Systems come with lids that protect seeds from dust, dirt and other impurities.

Easy-to-clean Botanicare® Propagation Trays can be used with a variety of growing media. Large drain channels make complete and efficient drainage easy for the hydroponic grower.

- Manufactured from white 70% recycled plastic wrapped in a virgin UV-resistant capping. BPA free.
- Can be used with several types of media, including our Horticultural Perlite, Grodan Delta Gro-Blocks™ and Jiffy 7-C Coir Pellets.
- Low Tide Tray (111105) provides greater flexibility for greenhouses and grow rooms and is designed for large-scale top feed drip, run to waste, or recirculation systems. Features a 2" gully on each side for better drainage than single center drains. Ideal for use with our Standard 1020 Flats, sold separately.
- Create your ideal layout by connecting several Low Tide Trays (111105) using the multiple bulkhead ports.

BOTANICARE PROPAGATION TRAYS

Botanicare Pallet Rack Trays for vertical propagation allow you to get the most out of your growing space.

- These 4' x 8' trays are designed to be used with standard, 42"W x 96"L pallet racking, allowing you to maximize your overhead growing space.
- Stackable design enables you to reduce your growing footprint by up to 50%.
- Trays feature a trough that hangs over the edge of the racking. It collects and redirects runoff to reduce the occurrence of standing water.
- Pallet Rack Trays are an ideal option for large-scale propagation or microgreen production. They are large enough to fit 16 10"W x 20"L propagation flats, making it easy to grow a number of different crops.

Ebb & Flo Systems let you grow big in a small space. These systems provide an effective and automated method to deliver optimal levels of water, nutrients and oxygen to your crops.

- Available in four sizes, these systems increase growth rate, yield, nutritional value and flavor of your crops.
- Utilizing the ebb and flow hydroponic method, these easy-to-use systems are perfect for propagating plants or nourishing and watering seedlings.
- Each system includes submersible pump, nutrient reservoir, grow tray, ebb and flo kit and 16-gauge, galvanized, square steel tubing frame with height adjustable feet for leveling.
- Custom, poly-injection-formed replacement fittings are available, sold separately.
- Trays and reservoirs are manufactured from durable ABS plastic with built-in UV inhibitors that minimize fading and yellowing from grow lights. Trays include drainage channels. Reservoirs feature porthole covers that make monitoring and refilling your nutrient solution easy.

Allow your plants to reach their full potential by encouraging a healthy root mass with Hydroguard™.

- Hydroguard™ supplies plants with an isolated form of Bacillus Amylolyquefaciens, which can increase root mass and health. Bacillus Amylolyquefaciens is particularly beneficial to hydroponic growing and can help to maximize plant yield.
- It works by breaking down organic materials and increasing nutrient availability.
- Hydroguard™ contains a minimum of 1.00×10^{14} cfu/ml. It is 0.038% Bacillus Amylolyquefaciens and 99.962% inert ingredients.
- Contents are guaranteed for 2 years after the date on the package, but they should be used within 6 months of opening.
- 1 Quart.

The EZ-CLONE PRO is the future of high-pressure propagation, utilizing patent-pending technology and space-saving design.

- EZ-CLONE PRO is a complete system that nourishes cuttings with nutrient-rich, high-pressure mist. Includes all the required equipment and hardware.
- The vertical design allows growers to save space, and 459 cuttings can be cloned in under 10 sq. ft. The trays sit on sliding drawers, so growers have easy access to cuttings.
- The EZ-CLONE PRO is based around a Nuert 75 PSI High Pressured Pump, which supplies the entire system with water and essential nutrients. The pump runs on a timer to allow precision misting.
- Water is stored in a 20 gallon reservoir, which is made from ABS plastic and includes handles. The tank features drains on a long and short side and has welded attachment points for quick disconnect fittings.
- Includes dual 3' T5 fluorescent lighting that is controlled by a timer that is mounted on the system.
- Catch tray ensures proper drainage and has built in misters that support uniform watering and nutrient delivery.
- Constructed with a high-quality steel frame that is powder coated with medical-grade coating. The plumbing can be hidden and protected within the system's frame.
- System sits on casters, which can be locked.
- Safety latches ensure each inlet and outlet is locked and fully engaged.
- Electrical components are stored in a leak-proof box that includes a removeable 120V cord. Only draws 5.1 amps.
- System fits through any standard size door frame.

EZ-CLONE PRO

116831	\$8,625.00	Side

Sleek design for convenient placement throughout any growing operation.

- 128 sites.
- Leak-proof design has an increased lip height, extended flange and drainage gutter.
- The lid and reservoir are made from UV-protected HDPE plastic, and they were manufactured to ensure increased structural integrity.
- The water pump has an extended baseplat and additional suction cups to prevent it from falling over.
- The cover features alpha numeric symbols, so multiple strains can be easily identified when they're in the EZ-Clone.
- Four-way finger slots for quick extraction.
- Comes with four different colored cloning collars.

Pestrap™ Insect Traps are an easy and cost-effective way to monitor and control pests.

- A crucial factor in effective integrated pest management. These yellow and blue cards attract and trap potentially harmful insects before they can cause serious damage.
- Utilizes an extremely sticky adhesive that is non-toxic.
- Grids enable quick, easy and accurate monitoring.
- Blue or yellow cards allow you to target specific pests.
- 3" x 5" traps are ideal for monitoring greenhouse conditions to avoid pest damage. Use one to three traps for every 1,000 sq. ft.
- 4" x 10" traps allow you to monitor and control pests. Use one trap for every 500 sq. ft. for monitoring and ten traps for every 1,000 sq. ft. for control.
- Disposable and pesticide free.

PESTRAP™ INSECT TRAPS

High-quality, above-ground, vertical water storage and mixing tanks are ideal for general farm needs, hydroponic systems, rainwater harvesting and more.

- variety of sizes available, perfect for many applications, including livestock water storage, hydroponic nutrient mixing tanks, aquaculture tanks, acid tanks and more.

52-Gallon Poly Tank

- Made of heavy-duty, polyethylene plastic, which is resistant to most chemicals.
- Flat-bottomed, cylindrical tank has straight sidewalls and is completely self supporting.
- Smooth sidewalls for easy cleaning and no sediment buildup.
- Depth: 30". Diameter: 22". Wall thickness: 3/16".
- Lid sold separately.
- 1 year manufacturer's warranty.

Norwesco Tanks

- Manufactured using resins that meet FDA specifications to ensure safe storage of potable water.
- Feature tie-down slots, built-in graduated gallon indicators, offset fill opening and a self-vented, slosh-proof lid.
- Impact-resistant, one-piece seamless polyethylene construction.
- Designed to meet a specific gravity of 1.5, or 12.5 lbs. per gallon at 73°F.
- Green color limits light penetration to reduce the growth of waterborne algae.
- 16" opening. 2" drain.
- USA Made. 3 year warranty from the date of manufacture.

Conical-Bottom Tanks

- Ideal for use in aquaponic systems.
- Cone-shaped bottom for total drainage.
- 45° bottom angle. (112736 & 115317 have a 15° angle).
- Conical-bottom, cylindrical tanks are made of 3/16" thick, blue, heavy-duty, chemical-resistant, polyethylene plastic. (115317 tank is 1/4" thick).
- Not self supporting. Frame sold separately.
- Lids sold separately.
- Optional window kit can be purchased for any size tank. Window piece is 28" x 18".
- 1 year manufacturer's warranty.

Service Weight Gaskets

- Available in three sizes, these gaskets are manufactured from EPDM material to withstand harsh sunlight and greenhouse environments. 1.5" and 2" Service Gaskets each require a 3" hole. 4" Service Gasket requires a 5" hole.

2" Mushroom Vent Cap

- Designed for maximum venting efficiency to compensate for positive or negative pressure buildup in a tank. All four sides meshed to keep insects and debris out of the tank.

Aeration System Components are vital for proper oxygenation and nutrient circulation of your hydroponic setup. Promote faster growth and healthier plants.

- Provide a constant supply of oxygen, as well as a steady current in your nutrient reservoir to ensure that nutrients do not settle.
- Ideal for all hydroponic systems, including NFT, float, ebb and flow, drip and aeroponics.

ActiveAqua Air Pumps (110725)

- 7.8 liters per minute. 3 W.
- Features silent operation with multi-level muffler.
- Special artificial rubber provides a steady air flow output and pressure that can be adjusted on multiple outlet models.
- Low power consumption.
- 4' power cord.
- 120 V. 60 Hz.
- Please note: Always keep your air pump above water level.

ActiveAqua Commercial Air Pumps (109258, 109259)

- Available in 70 liters per minute (60 W) and 110 liters per minute (112 W) models.
- High pressure and high output. Comes with multi-outlet divider (8 and 12) that can be opened or shut.
- Electrical magnetic air compressor in a high-quality aluminum alloy case, with wear and tear-resistant material for cylinder and piston.
- Provides quiet operation, long service life and very low energy use.
- Perfect to run multiple Air Stones at once.

ActiveAqua 6"L Pumice Air Stone/Air Diffuser (109260)

- Keeps root systems healthy while extending life of nutrient solutions.
- Provides uniform bubbles for air diffusion.
- 1/4" OD (air supply connection).

Sweetwater 3"L Air Stone/Air Diffuser (110077)

- High-quality ceramic is machined from a solid block of glass-bonded silica.
- Air Diffuser produces a uniform medium/fine bubble and is extremely resistant to clogging.
- Low maintenance—in most soft water applications, this Air Stone will not have to be cleaned for more than a year.
- Air Stone measures 1.5"W x 3"L.
- 3/8" OD (air supply connection).
- 2 year guarantee.

1/8" (110091) and 9/16" (WF1176) Clear PVC Tubing

- Use in combination as header tubing and air-supply tubing to provide aeration and nutrient circulation.

UNF Adapter Thread (109242)

- Use to prevent air and water leaks at tubing connections.
- 0.16 Barb x 10/32 UNF thread.

Dolphin Pumps are designed and manufactured for maximum efficiency and minimum power consumption, allowing for cost-effective and worry-free operation of your hydroponic system.

- High-performance wet end designs.
- Continuous-duty, weather-proof motors and dual-sealed bearings.
- For fresh water applications only.
- For indoor or unprotected outdoor use.
- Anti-vibration pump pad and new super seal unions included.
- Corrosion resistant.

Premium Efficiency Diamond Aqua Sea 9250 & 9500 (111146 & 111147)

- High head, low current draw.
- 111146: 115 V, 50/60 Hz, 1 HP, 9,250 GPH.
- 111147: 230 V, 50/60 Hz, 1 HP, 9,500 GPH.
- 1-1/2" supply and discharge.
- 111146 comes with supply cord. 111147 is un-corded.
- 2 year manufacturer's warranty with 10 year free extended service guarantee.

Super Amp Master 7200 (111148)

- Designed to consume the lowest amount of energy per gallon pumped.
- Flow rates may be dialed back by a ball valve with no harm to pump. Electric current draw drops as flow is reduced.
- Super flow turbine-style impeller. Stainless steel crane seal for superior seal life.
- 115 V, 1/3 HP, 50/60 Hz, 7,200 GPH.
- 2" supply and discharge.
- Comes with supply cord.
- 1 year manufacturer's warranty with free 10 year factory service guarantee.

Super Aqua Sea 12500 (111149)

- Super-efficient high head, high-pressure/flow system pump.
- Built to consume the lowest amount of current for each gallon pumped.
- 115 V, 3 HP, 50/60 Hz, 12,500 GPH.
- Comes with supply cord.
- 2" supply and discharge.
- 1 year manufacturer's warranty and free 10 year factory service guarantee.

GROW ACCESSORIES

Dolphin Pump Accessories

True Union Swing Check Valves (111150 & 111153)

- Can be used with all water types.
- No metal, pressure or flow restrictions as found with spring check valves.
- Can be removed for cleaning and service.

1-1/2" Enclosed Intake Strainer (111154)

- Flexible poly base.
- Insert into 1-1/2" PVC fitting or 1-1/2" thin wall PVC pipe.
- Top diameter: 3.8". Bottom diameter: 4.71".
- Strainer height: 4.87". Overall height: 8.12".

2" Machine Slotted Intake Strainer (111155)

- Can be used for direct 2" intake.
- Comes with solid cap and 2" x 1-1/2" reducer bushing.
- Height: 11", including fitting.

EZ Primer/Strainers (111151 & 111152)

- Must be used in conjunction with Swing Check Valve when drawing water up an incline.
- Protects pump from debris that can clog or damage the impeller.
- Prevents noise from water cavitations in wet end, improving pump performance.
- Easy lid removal.

Indoor/outdoor Magnetic-Drive Recirculation Pumps are ideal for hydroponic systems, ponds and more.

ActiveAqua Recirculation Pumps (110721, 110722 & 110723)

- Available in 250 GPH, 550 GPH, 800 GPH and 1,000 GPH flow rates.
- Multi-use submersible pumps with powerful mag-drive construction.
- Removable foam filters and impeller included.
- Outlet fitting sizes:
 - 250 GPH unit—1/2", 5/8", 3/4".
 - 550 GPH and 800 GPH units—1/2", 3/4", 1".
 - 1,000 GPH unit—1/2", 3/4", 1".
- For indoor/outdoor use. Oil free and environmentally safe.
- 1 year manufacturer's warranty.

Pro Recirculation Pumps (110719)

- Available in 500 GPH and 700 GPH flow rates.
- Heavy-duty Danner Mag-Drive Pumps are fully submersible or can be used as inline pumps.
- Includes exclusive fine mesh foam pre-filter, impeller and exclusive hose/thread adapter.
- 1/2" FPT inlet. 1/2" MPT outlet.
- For indoor/outdoor use. Oil free and environmentally safe.
- 5 year manufacturer's warranty.

Maintain clean, nourishing water with products from HydroLogic Purification Systems.

HydroLogic Purification Systems provide a wide range of products to ensure the finest water for your hydroponic, aquaponic or aeroponic systems. HydroLogic Systems are environmentally friendly and energy efficient, helping growers save time, as well as money. These systems are completely manufactured in the United States using green technologies

Big Boy De-Chlorinator & Sediment Filter (115702):

Is an extra high-flow filter that has a rate of 7 gallons per minute or 420 gallons per hour. It filters 99% of chlorine and at least 95% of sediment, providing only the purest water.

Evolution-RO1000 (115703):

Is a high flow reverse osmosis system capable of producing 1,000 GPD or 42 gallons per hour of pure water. Removes at least 94% of all parts per million and includes a KDF/Catalytic Carbon Filter and two membranes to reduce chlorine, chloramines, iron, sulfur and heavy metals. Highly efficient model runs 1:1 or 2:1 waste to product ratio.

Pre-Evolution (115704):

Is a high capacity pre-filter for the Evolution-RO1000. It promotes the efficiency of the Evolution and requires little maintenance. Highly recommended for systems that use more than 150 gallons of water per week. It features a cleanable sediment filter that can be reused. Has a combination of KDF85 and KDF55 with an environmentally friendly catalytic carbon filter that reduces chlorine, chloramines, iron, sulfur and heavy metals.

Big Boy with Upgraded KDF (115707):

Provides the same benefits of the Big Boy De-Chlorinator & Sediment Filter, but is upgraded with a KDF85/Catalytic Carbon Filter for extra chloramines removal.

Evolution Pressure Booster Pump (115701):

Is 220V, heavy-duty pump that is designed for continuous use and can be used 24/7. It features an adjustable pressure dial, as well as low and high pressure switches. Boosts pressure to 80 psi with the Evolution-RO1000 and can be used with HydroLogic float valves. Requires a minimum of 20 psi, and it includes a pump protector/inlet filter and 1/2" QC fittings.

TDS Pro Dual Monitor (115700):

Is an in/out PPM monitor with 1/2" inlet and 3/8" outlet. Measures unpurified water PPM going into the reverse osmosis, and then measures the PPM of the purified water coming out. Easy-to-read, instant display that can be easily switched between clean and dirty water TDS. Designed to be used with Evolution-RO1000 and tells grower when to change RO membranes.

Big Boy Sterilizer Kit (115705):

Is an 8 GPM ultraviolet sterilizer that provides 100% protection from bacteria, viruses, cysts and pathogens, ensuring the safest water. It includes stainless steel UV unit with 3/4" MNPT ports, wall mount clips and transformer. Can be used with Big Boy and most RO and filter systems with up to 8 GPM.

Evolution-RO1000 UV Sterilizer Kit (115706):

Is a 1 GPM ultraviolet sterilizer kit for the Evolution-RO1000, Merlin Garden Pro and most RO and filter systems with 1/4" and 3/8" fittings and up to 1 GPM flow rates. It provides 100% protection against bacteria, viruses, cysts and pathogens.

Big Boy Green Coconut Carbon Filter (115686)

Big Boy Pleated Sediment Filter (115687)

Big Boy KDF85/Catalytic Carbon Upgrade Filter (115688):

Doubles filter life and has a 50,000 gallon capacity. Microbes won't breed in filter, and it reduces chloramines, chlorine, iron, sulfur and heavy metals.

Evolution-RO1000 Blue Carbon/KDF Filter (117155)

Evolution-RO1000 Membrane (115689):

Systems require two membranes.

Pre-Evolution KDF/Catalytic Carbon Filter (115691)

Pre-Evolution Cleanable Sediment Filter (115692)

Evolution-RO1000 Wall Mount Bracket (115685):

Conveniently holds the Evolution-RO1000 system to the wall.

Big Boy Garden Hose Connector Kit (115696):

Allows for garden hoses to be hooked up to the inlet and outlet of the Big Boy system.

1/2" Float Valve (115697):

Features a 1/2" barb and an adjustable water level. Made with stainless steel and PVC components.

3/8" Float Valve (115698):

Has a quick connect fitting and can be used on the Evolution-RO1000 or any other filter system with 3/8" tubing. It features an adjustable water level and can be mounted vertically or horizontally. Made with stainless steel and PVC components.

3/4" Float Valve (115699):

Is a heavy-duty and high-flow unit. It is non-corrosive and has a .48" orifice valve. It features an adjustable water level and is made with NSF approved PVC, stainless steel and rubber seals.

1/2" White Tubing, 25 ft. (115693)

3/8" Black Tubing, 50 ft. (115694)

Efficiently cool your nutrient solution to keep algae growth at bay, maintain proper pH levels and grow cool-weather crops during hot weather with Teco® Water Chillers.

- Teco® chillers use high-performance technology to ensure maximum performance with low energy consumption.
- The Teco® air system provides improved performance by optimizing air exchange and utilizing a rotatable exhaust.
- A closed loop temperature control system provides premier accuracy and stays within 0.2°F.
- Chillers are housed in durable units made from high-quality materials. They are corrosion-resistant and a great option for use with or near salt water.
- The filter screen is magnetically affixed, so it is simple to clean, maintain, remove and install.
- Requires a recirculation pump, sold separately. Ask your knowledgeable National Account Manager which pump will work best for your setup.
- 113859 requires no heater. 113860, 113861, 113862 come with a built in heater, and 113863 and 113864 require a Heater Kit (110718), which is easy to install and includes a custom designed 400 W heater.

Take your irrigation control to the next level with the most reliable and impressive controller in the industry. The affordable, yet high-end, PC-400 enables you to regulate as many as 16 zones, and its numerous features mean that you'll always have the right amount of water.

- Due to its modular design, this four-station controller can be easily expanded upon. The PCM-300 (113783) adds 3 extra zones and allows the controller to be expanded from 4 to 7 zones, 7 to 10 zones or 10 to 13 zones. The PCM-900 (113784) adds 9 zones, enabling you to take the controller from 7 to 16 zones.
- Provides a maximum station runtime of 6 hours.
- The non-volatile memory keeps settings indefinitely, so you don't have to regularly reset the controller.
- Programmable rain delay can postpone watering and the cycle and soak feature reduces runoff, allowing you to save money on watering.
- Built in lighting programs enable you to add lighting control.
- Adjustments can be postponed up to 99 days.
- 120 V AC.
- Cabinet dimensions 10"W x 9"H x 4-1/2"L.

Portacool Jetstream and Hurricane evaporative coolers provide efficient and effective portable cooling.

- Sizes for any application.
- Features Kuul Comfort MicroTech™, the highest-quality evaporative media available, made exclusively for Portacool.
- Variable speeds.
- Set on castors for mobility.

Jetstream 220 (116613)

- Powerful cooling in a compact design. Great for tight spaces.
- Oscillating louvers deliver cooling comfort.
- 30 mph velocity.
- 3.4 amps.
- 20 gallon reservoir.

Jetstream 230 (116614)

- Designed for maximum versatility.
- Great for open or confined workspaces.
- Features oscillating louvers.
- 27 mph velocity.
- 8.3 amps.
- 30 gallon reservoir.

Jetstream 250 (116616)

- Utilizes same amount of energy as a standard household appliance.
- Larger drain allows for easy and effective maintenance.
- 24 mph velocity.
- 6.6 amps.
- 55 gallon reservoir.

Jetstream 260 (116617)

- Efficient design that uses approximately the same amps as a standard wet/dry vacuum.
- Larger drain provides easy and effective maintenance.
- 25 mph velocity.
- 9.3 amps.
- 60 gallon reservoir.

GROW ACCESSORIES

- Low water shut off.
- Jetstream coolers feature a 3 year warranty on the motor and electrical components. Hurricane coolers come with 5 years.

Jetstream 270 (116618)

- Whole shop cooling for a fraction of the operating cost of traditional coolers.
- Larger drain for easy and effective maintenance.
- 26 mph velocity.
- 15.2 amps.
- 65 gallon reservoir.

All-in-one, ready-to-use Hanna® Fertigation Systems give the professional and advanced home grower precise control over nutrient and pH levels in their hydroponic systems.

- HI 2,500 Kits are recommended for small to mid-size systems. Each HI 2,500 Kit includes an EC or TDS Mini Controller, EC or TDS Probe, pH Mini Controller, pH Electrode, two Blackstone Dosing Pumps and NEMA Enclosure.
- HI 5,000 Systems are ideal for larger and commercial hydroponics, including NFT, dutch buckets, flood tables and full greenhouse setups. Versatile and easy to install. Comes completely assembled on a compact panel with no wiring necessary.
- Automated dosing feature allows the grower to optimize plant growth while saving time on measuring, mixing and dosing.
- Choose your system based on your preferred measuring method: electrical conductivity (EC) or total dissolved solids (TDS).

Fertigation System Components are also available separately.

Hanna® Mini Controllers (110751, 110752, 110753)

- Offer reliable, efficient and affordable process monitoring and control. Features fire-retardant casing, LCD screen, selectable overdose protection system, external disable feature and selectable control override. Dimensions: 3" x 2".
- EC and TDS Mini Controllers (110741 and 110753) are crucial for maintaining water quality and nutrient level.
- pH Mini Controller (110752) ensures that the nutrient solution is maintained at the proper set pH level for nutrient absorption.

Blackstone Dosing Pumps (110754 and 110755)

- Engineered to meet the highest chemical handling standards.
- Equipped with a single control for pump output.
- External Flow Rate Control allows user to adjust flow percentage up to 100% of the rated capacity.
- Includes 3' power cord with plug and 23' of LDPE suction/discharge tube.

NEMA Enclosure w/2 Meter Capacity (110750)

- NEMA standard weather-proof enclosure.
- Includes wiring to probes (2) and mini controllers (2), all sold separately.

EC/mS Probe (110756) and TDS Probe (110758)

- Built-in NTC sensor provides temperature compensated conductivity measurements.

pH Electrode (110757)

- For continuous flow monitoring.

HI 2500 Fertigators allow you to supply your plants with nutrients, have complete control over pH levels, as well as maintain optimal EC and TDS levels.

- Grow the healthiest plants. The HI 2500 doses plants with nutrients to promote the growing cycle and doses acid to keep hydroponic systems within the right pH ranges.
- HI 2500 Fertigator EC (113709) maintains the proper electrical conductivity levels, while the HI 2500 Fertigator TDS (113710) supports the correct total dissolved solids levels.
- This system comes fully assembled and is easy to maintain and clean. The probes can be quickly disconnected for maintenance or replacement.
- Monitors pH ranges of 0 to 14, TDS ranges of 0 to 999 ppm and EC ranges of 0 to 10 mS/cm.
- Includes controllers, probes, one acid pump and two nutrient pumps.

Grow the healthiest crops, and protect them from insects and fungi by using this environmentally friendly product that is safe for use around people, pets and livestock.

- This natural product is skin-contact safe and can eliminate the costs associated with workers' compensation claims and litigation due to exposure to toxic pesticides, fungicides and cleaning products.
- Made with an environmentally friendly formula that won't contaminate ground water, lakes, streams or wells.
- Promotes the health of plants and the function of irrigation, aquaponic, hydroponic and fodder systems by fighting the buildup of inanimate microscopic particulate, like slime and de-scale mineral deposits. This helps to improve the osmotic action in the plants' roots and eliminate the need to clean your growing equipment's irrigation lines, pipes, tanks and pumps, which reduces labor costs and the need to replace equipment.
- By improving the function of the roots, Z⁷ helps to make fertilizers more effective and enables you to use less fertilizer.
- Fights water spots and keeps crops looking, smelling and tasting their best.
- When used in aquaponic systems, it can support a healthy biofilter and allow for more active fish.

General Hydroponics Nutrient Systems allows growers to invest in their crops and achieve superior production and quality.

- This comprehensive nutrient system helps growers boost growth in almost any environment.
- Provide precision feeding and consistency through every growth phase.
- Following the building-block method, the system combines nutrients in different ratios to create specialized mixes that increase control over plant development.
- Ideal ratio of minerals and balanced plant nutrition.
- Achieve premium results all year long.

MOTHER EARTH® COCO

STK#	ITEM	EACH
117382	Mother Earth® Coco, .75 cu. ft.	\$29.95

Specially designed to compensate for deficiencies in some nutrient fertilizer programs.

- Prevents blossom end rot in tomatoes and peppers and tip burn in lettuce and cabbage.
- Protects against dry and withered flower and fruit sets, interveinal chlorosis, stunted growth rates and upward leaf curl.
- Increases cell division, plant tissue development and water, nutrient and carbon dioxide uptake.
- Produces more flower and fruit sets. Increases growth rates and crop maturity.
- Guaranteed analysis: 2-0-0. Standard-strength solution, 5 ml per 4 liters water, will achieve approximately N: 53, Ca: 84, Mg: 31 and Fe: 2.6.
- Ideal for hydroponics, soil growing and container gardens. We recommend using with our Jiffy-7C Coir Pellets, sold separately.
- Recommended for use with reverse osmosis water.
- Available in one-quart and one-gallon containers.

Ed Rosenthal's Zero Tolerance® Pesticide naturally fights pests and molds.

- Meets EPA guidelines and is 100% vegan.
- Fully evaporates within five days, leaving no residue.
- Designed for plants that have a waxy surface, but can be diluted to safely treat delicate plants.
- Kills and repels spider mites, aphids, thrips, caterpillars, mealy bugs and molds.
- Can be used within a week of harvest.
- Available in concentrates. One concentrated pint makes 2.4 gal. and one concentrated quart makes 5 gal.

Monitor and maintain optimum conditions for your plants, flowers and vegetables.

Determines soil pH and fertility levels (103397).

- Fast results. Each test takes just one minute.
- Requires one AA battery, not included.

Take the guesswork out of gardening (103398).

- Easy-to-read dial, great for indoors and outdoors.
- Includes recommended pH ranges for over 350 plants.
- Allows you to alter your soil conditions immediately.

Grow healthy and thriving plants by maintaining correct soil moisture (103399).

- Instantly tells you moisture levels where it matters the most, at the roots.
- Helps prevent over/under watering.

Easy-to-use testers are well built, reliable and will assist you in growing superior crops.

Waterproof Combo Tester – pH/EC/TDS/Temperature (107659)

- Fast, efficient, accurate and portable. The Combo Tester incorporates it all.
- The graphite conductivity electrode provides greater accuracy as it cannot be contaminated by salt deposits in the solution.
- Large, easy-to-read, dual level LCD, with automatic shut-off.
- Features an easy-to-replace pH electrode with extendable cloth junction. Replacement electrodes are sold separately below.
- Protective cap, electrode removal tool, batteries and instructions included.
- pH and EC/TDS readings are automatically compensated for the effects of temperature.
- EC Range: 0 μ S/cm-3,999 μ S/cm. pH Range: 0-14. TDS Range: 0 ppm- 2,000 ppm. Temperature Range: 32°F to 140°F (0°C to 60°C).
- Four 1.5 V batteries with BEPS (Battery Error Prevention System) included.
- Use with electrode solutions (113814-113818) sold separately.

Waterproof pH/EC/TDS/°C Meter for Growers (108251)

- Measure pH, EC, TDS and temperature in the °C scale in just one instrument.
- Fast response probe.
- Available only with °C display.
- Exclusive CAL CHECK™ feature.
- Includes probe with cable, calibration, cleaning and test solutions, one 9 V battery and protective case.

pH/TDS/Temperature Monitor (108253)

- Designed for continuous monitoring.
- 3-probe monitor: TDS, pH and temperature.
- Cannot be used for direct soil measurement.
- Ideal for hydroponic monitoring.
- Accurate measurements are simultaneously displayed on three backlit LCDs.
- Measures in °C or °F.
- Extra-large display.
- Includes cleaning solution and 12 V DC power adapter.

Combination pH/ORP Waterproof Tester (108254)

- Measures ORP for water ionization and chlorine sanitization.
- Automatic temperature compensation. Automatic calibration.
- Rugged housing is completely sealed against humidity and is designed to float.
- Comes complete with protective cap, probe removal tool, four 1.5 V batteries with BEPS (Battery Error Prevention System) and instructions.

HydroMaster Digital testers make monitoring water easier than ever by reading the levels that matter most and providing accurate readings that you can depend on.

Waterproof pH Temperature Tester (112507)

- Features as dual-level LCD, battery level indicator, replaceable pH electrode cartridge, stability indicator, automatic shut-off and automatic calibration.
- Floating, waterproof casing.
- pH Range: 0 to 14. Temperature range: 32°F to 176°F (0°C to 80°C).
- Comes complete with protective cap, electrode removal tool, three 1.5 V batteries with BEPS (Battery Error Prevention System) and instructions.
- Use solutions and cleaners (112505, 112506, 107673 and 112503).

Waterproof EC/TDS/Temperature Tester (112504)

- Detachable platinum electrode, adjustable TDS ratio, in °F or °C, automatic temperature compensation with adjustable β beta ratio, battery level indicator, stability indicator, automatic shut-off and automatic calibration.
- These 3-in-1 testers are unmatched in EC/TDS/temperature measurement and have a floatable, waterproof casing.
- EC range: 0 μ S to 9,990 μ S. TDS range: 0 ppm to 8,560 ppm.
- Temperature range: 32°F to 176°F (0°C to 80°C).

HydroMaster HM-500-pH/EC/TDS/°F Tester (113831)

- Tests pH at a range of 0 pH-14 pH, temperatures from 30°F-176°F, TDS from 0-9999 ppm and EC from 0-9999 μ S.
- Stores up to 20 measurement readings, so you can monitor changes over time.
- LCD touch-type screen with auto back lighting.
- Powered by a rechargeable lithium ion battery.
- Features an alarm that has an adjustable set point.
- Automatically turns off after 5 minutes.
- Comes with mountable bracket, USB cable and wall adapter, 1 EC/TDS conductivity sensor and 1 pH sensor with storage solution bottle.
- 110 V-220 V.

The HI 97500 Lux Meter combines an easy-to-use design with rugged construction to create the perfect portable light meter, especially in the field.

- The meter, which features an LCD screen, is attached to a light sensor via a 1.5 meter cable that ensures you never interfere with measurements.
- Housed in a durable, water-resistant body, making it ideal for use outdoors.
- Three different kilolux range options allow you to choose the best resolution (0.0001 to 199.9) for the environment being tested.
- Runs on a 9V battery that provides 200 hours of operation.
- Accuracy: +/- 6 percent of reading +/- 2 digits.

Allow your tomato plants to climb with the Easy Grow Cable Trellis Kit.

- Simplifies the management of your trellised tomato plants.
- This 132'L trellis kit can be paired with our longest HydroCycle Dutch bucket system or cut down to fit smaller systems and shorter rows.
- Supports 350 lbs. of mature plants on a 12' run.

CABLE TRELLIS KIT FOR TOMATOES

STK#	EACH
113822	\$35.95

This 6" trellis netting is designed to stay tight and handle more weight, ensuring superior support for your crops.

- Promotes increased harvests and cleaner produce.
- Features 6", reach-through mesh.
- High-density polyethylene.
- 4'W x 8'L.
- Limits effects of pests, fungus and disease.
- Great for tomatoes, grapes, sweet peas and other vine crops.

TRELLIS NET

STK#	EACH
116978	\$6.05

Save trellising labor time.

- Designed to avoid slipping or jumping from the wire, this unique assembly enables smooth lowering with full control.
- Quick-release feature for the first 3 to 4 meters of twine.
- Includes assembly body and a 15 meter (49-1/4') spool of RollerPlast White Twine.
- Additional assembly bodies and twine sold separately below, in case quantities of 800 each.

Hooks, Holders and Supports keep your vines healthy and prevent plant damage.

Two-Piece Radial Hook (110008):

Easy-to-use hook fits over wire with up to a 3.75 mm diameter. Intended for multiple season usage, this unique hook helps prevent plant breakage. Sold in bulk-packaged quantities of 100.

Flexible Arch Cluster Support (110005):

Intended for use during the cluster's flowering stage. Offers a support arch for the cluster stem. Aired support promotes better ventilation and helps prevent Botrytis fungus. Quick and easy to install. 6 mm wide. Sold in bulk-packaged quantities of 1,000.

Stem Holder (110016):

Ideal for difficult-to-manage stems and plants. Prevents drooping, bending and flopping, allowing plants to grow strong. UV protected. Long lasting. Sold in bulk-packaged quantities of 100.

Super J Double Cluster Support Hook (110017):

Unique design offers support and prevents damage to the cluster stem. Easy to use. Sold in bulk-packaged quantities of 100, boxed quantities of 5,000 or economical case quantities of 17,000.

Wonder Soil® is an eco-conscious soilless biodegradable potting medium made from renewable coconut coir fiber, worm castings, mycorrhizae, kelp and water-saving polymer crystals. This medium maximizes growing success for both the professional and hobby grower. One truckload of Wonder Soil® is equivalent to 10 truckloads of loose soil!

- Available in a variety of forms and sizes for all gardening applications.
- This dehydrated, compressed medium will expand up to 7 times its volume when water is added.
- Reduces watering and fertilizing costs by up to 50%.
- Produces a soilless medium with a perfect balance of water-to-air ratio.
- Completely safe for use around children and pets.
- Produces stronger seedlings with larger root systems, as well as healthier transplanted and potted crops.
- Reduces soil erosion and compaction.
- Lightweight, easy to use and contains no fillers.
- Wonder Soil® is not for sale in the state of Texas or Massachusetts unless noted.

Earth Friendly Wonder Soil® Expanding Wafers:

Designed for smaller pots and seed starter cells, these wafers are formulated to promote faster germination and yield up to 40% more sprouts. Also ideal for boosting the soil of existing plants.

Wonder Soil® Reground:

Made from Wonder Soil® compressed sheets that have been reground into thousands of tiny expanding granules. Compact, lightweight and easy to use. The 5 lb. bag expands to 1-1/3 cu. ft., when water is added. The 25 lb. bag grows to 7 times its size. Reground is ideal for all planting applications and is amazing for rapid lawn repair when mixed with grass seed. Scoop is included. 112654 has shale and azolite added and is ideal for rooftop gardening. Be sure to stir and aerate the soil so it doesn't become oversaturated when adding water

Wonder Bricks®:

Earth-friendly Wonder Soil® potting mix is compressed into brick forms for larger planting projects. Each brick weighs just over 1 lb., yet expands up to nine times the volume when water is added. Lightweight, compact and easy to use, each brick will expand to fill 2-1/2 one-gallon pots.

Horticultural Perlite helps plants thrive and improves soil structure, keeping it workable for years. This inorganic mineral will produce healthier plants that require less labor and watering.

- Perlite provides aeration and drainage, yet retains and holds substantial amounts of water that it releases when needed.
- The water-holding ability of Perlite also increases the nutrient holding capacity when water-soluble fertilizers are used.
- Can be used by itself, mixed with topsoil or potting soil, or any other sterile media for drip or passive hydroponic systems.
- Lightweight Perlite does not crush fine stems or root systems, making it ideal for growing delicate plants such as lettuce.
- Chemically inert, does not deteriorate and has an essentially neutral pH.
- As Perlite is sterile, it is free of disease, weed seeds and insects.
- Nontoxic, safe and economical to use. One 4 cu. ft. bag will fill approximately 64 one-gallon nursery pots or eight of our 11-Liter HydroCycle Dutch Buckets (115683).

Cocogro® Coir Fiber provides plants with a superior growing environment, allowing them to meet their full potential.

- This premium, coir fiber blend is ready for use right out of the bag, and it can be easily amended to perlite, expanded clay, potting soil or any other aerator to create the perfect consistency.
- Features long fibers that provide the perfect air to water ratio, creating an environment where roots can thrive.
- Cocogro has a high cation exchange rate, which increases the ability to retain nutrients.
- Low E.C.
- This media is pre-hydrated and has yucca added to promote the proper saturation through the reduction of water tension.
- 100% renewable.
- 1.75 cu. ft.

Vermiculite allows growers to create a grow media that promotes healthy, profitable crops.

- Coarse vermiculite improves soil's ability to nourish plants by improving its water retention and aeration.
- Vermiculite is a natural mica mineral that expands under extreme heat.
- Loosens soil, allowing roots to spread and grow.
- A great option for seed germination and cutting propagation.

Optimize plant growth with this Digital Temperature Controller.

- Guard against too much or too little heat.
- Provides constant optimum temperatures for specific crops.
- Illuminated indicator light.
- 3-prong ground plug.
- Controllable range from 68°F to 108°F.
- Both Celsius and Fahrenheit read outs.
- Compatible with all heat mats.

HEAT MAT THERMOSTAT

STK#	EACH	3 & UP
103648	\$56.95	\$52.95

Provide even, constant heat directly to the root zone.

- Increase growth and reduce production time by maintaining proper root zone temperature. Ideal for use with flats and pots.
- Excellent for plant propagation or growing, these portable, easy-to-install mats will heat up to 120° F.
- Designed for use on greenhouse benches or any flat surface.
- Waterproof mats are manufactured from thick, flexible, rubberized PVC for better heat retention.
- Includes 5' power cord and plug. 120 V AC.
- 2 year manufacturer's warranty on mats.
- Redi-Heat™ Heavy-Duty Propagation Mats should be used with a thermostat to maintain desired temperature. We recommend our Redi-Heat™ Digital Thermostat and Bench Plate, each sold separately. Failure to use thermostat voids mat warranty.

Redi-Heat™ Digital Thermostat (111519)

- 120 V. 2,400 W max. Built-in 20 A circuit breaker.
- 40°F to 99°F set temperature range, with +/- 1° accuracy.
- Includes 9' power cord, 52" long sensor cable and 5/32"W x 1"L sensor probe, which is small enough for use in the cell of a plug tray.
- Features digital set temperature display and up/down buttons to set temperature.

Bench Plate (106156)

- Bench Plate is 5"W x 7"L x 12"H and made of painted steel.
- Can be mounted to bench or shelf to hold Thermostat (111519).

The Svensson White Lined Ground Cover is a perfect choice for indoor use. Its white color reflects light and provides support to plants of all kinds, making it the most-effective option.

- Made from 100% polypropylene, this cover is highly reflective and increases the amount of light that plants get, which can help to improve overall quality.
- This cover is strong, durable and can be walked on, all while weighing just 100 g per square meter.
- Maintains healthy soil by eliminating the growth of weeds, and with a water permeability of 10 l/m²/s, it still enables proper moisture levels.
- Cover has a clean, neat and appealing appearance that looks good in any greenhouse.

Suppress weed growth while allowing air, water and nutrients to pass through to plants. Excellent for short and long-term landscapes, annual or container gardens.

- Safely eliminate weeds while enhancing plant growth.
- Conserve soil moisture and promote healthy plant growth by eliminating competing weeds.
- Allows for the proper balance of air, water and nutrient exchange.
- Ground cover performs four significant functions: weed restriction, soil separation, reinforcement and filtration.
- Ideal for all residential and commercial applications.
- Easy installation. Conforms to the ground or trench surface and does not unravel when cut.
- Sold by the full roll only.
- Secure with our Biodegradable Fabric Stakes or our Fabric Securing Staples, both sold separately.

Polyspun Weed Control Fabric (108319-108321):

Polyspun polypropylene geotextiles are fabricated by sandwiching layers of fabric, which is then spunbonded for extra strength and light blockage. This 2 oz. fabric is hydrophilically treated to increase water flow. UV-treated for a longer life span, this fabric is ideal for use under bark, rock and organic materials to separate materials and provide weed control.

Spunbond General-Purpose Fabric (108322-108324):

Our Spunbonded polyester geo-fabric is a favorite with landscapers due to its strength and versatility. Highly resistant to acids, alkalines, insecticides, fertilizers and damage from insects. With its inherent UV resistance, this fabric is ideal for use as a patio or paver liner and will increase the life of the patio or walkway. Separates sand/aggregate from the soil to reduce shifting. This versatile 2 oz. fabric works well in many applications. Wrap around drainage pipes to keep native soil and silt from clogging drainage lines.

Standard-Duty Ground Cover (103797-103799, 103729, 103041-103042):
3 oz. per sq. yd. fabric is manufactured from UV-resistant, black polyethylene that has a long life expectancy. Marked every 12" for easy plant alignment, measuring and cutting.

Heavy Duty Ground Cover (108196-108201):

Premium, landscape-quality, black 4.1 oz., 30 mil woven, needle-punched fabric is manufactured from UV-resistant polypropylene. This durable, commercial-grade cover is the choice of most landscapers. Marked every 12" for easy plant alignment, measuring and cutting.

71

Eliminate penetration of insects and other pests, while providing maximum airflow.

- Transparent, woven, natural-color, HDPE anti-virus screen is ideal for vents, doors and more.
- Construction: 51 x 25 mesh. UV stabilized.
- Creates a controlled environment, eliminating pests and preventing plant disease.
- Offers a 12% shade factor.
- Reduces the need for spraying and exposure to costly and undesirable pesticides.
- Excludes Whitefly, Aphids, Leafminers and up to 80% of Western Flower Thrips in field applications.
- Lightweight and easy to install. Use our Poly Latch, Fabric Clips or Batten Tape for fast installation.
- Maximum roll length: 300'.
- Priced per linear ft.
- Insect Screen Kits are easily installed when paired with Growers Supply's hinged end wall vents. The kits provide ample surface area for superior air flow, and the frame and hardware required to connect the vent framing is included.

GROW ACCESSORIES

Shown with our Polypropylene Sand Bags (107339), sold separately below.

Provide up to 8 degrees of frost protection and increase yields with low-maintenance FrostGuard Row Covers.

- Also ideal for overwintering container stock, and protecting plants from insects and other pests.
- Manufactured from 100% polypropylene, spunbonded with UV stabilizers for long-lasting use.
- Seams are sealed with UV-stabilized, hot-melt glue for strength and durability.
- Choose the degree of light filtration and frost protection for your crops and climate.
- Actual fabric life will depend on amount of exposure and intensity of sunlight.
- This product is intended for frost protection and is not designed to hold heavy snow or sleet.

FrostGuard Lightweight Row Covers (116027, 116010, 116011 & 116028):

0.55 oz. per sq. yd. Offers 85% light transmission and 2 to 4 degree frost protection. Ideal for frost-sensitive perennials and vegetables.

FROSTGUARD LIGHTWEIGHT ROW COVERS

Giga Vent Opener sold separately.

Start seedlings, toughen up young plants for early spring planting or overwinter summer-rooted cuttings with our exclusive Heavy Duty Cold Frame.

- Manufactured from 14-gauge, 1.5" square Heavy Duty, USA-made, triple-galvanized steel tubing.
- 8 mm UV-stabilized polycarbonate panels that offers superior heat retention, prevents sun scorch and comes with a 10 year warranty.
- 4'W x 7'9"L frame slopes from a height of 23" in the back to 17" in the front.
- Aluminum connectors and profiles add a finished, professional appearance and help to keep out insects and moisture.
- Stainless steel hinges and latch ensure greater strength and durability.
- Team up with our Soil-Warming Cables, sold separately, to create your own hotbed.
- Hinged Combo-Top either slides or manually lifts open with handle for easy access.
- For automatic climate control, install our GigaVent Solar-Powered Vent Opener (106119), sold separately.

GROWSPAN HEAVY DUTY COMMERCIAL COLD FRAME

STK#	EACH	2 & UP
106363	\$959.00	\$925.00

Plastic Lumber comes in black only.

Start seedlings early, toughen up young plants or extend your growing season with a GrowSpan Flip-Top Cold Frame.

- Framework is constructed from 19-gauge, 1.05" OD USA-made, triple-galvanized structural steel tubing.
- Covering is made from UV-resistant, translucent, 4 mm white corrugated sheets that offer long life and durability.
- Flip-top feature allows for maximum air circulation and additional sunlight.
- Helps moderate and stabilize temperatures, encourages better air circulation and protects your plants from rain, wind, insects, birds and other pests.
- 2" x 6" poly lumber base, that comes with a 50 year warranty, is included. This Black Recycled Plastic Lumber is extremely durable and will not rot, crack, split or splinter like real wood. It is protected by UV stabilizers, so there is no dramatic fading after exposure to the elements.

ClearSpan

Since 1979, ClearSpan™ has been providing the most dependable building solutions across dozens of industries.

ClearSpan™ structures are among the most versatile and dependable, and whether you need a building for commercial storage, sand & salt, athletics or anything else, there's a custom or turnkey ClearSpan building. Contact a Building Specialist now for a free project quote, and find out why businesses across the globe trust ClearSpan for all their business needs.

THE CLEARSPAN ADVANTAGE INCLUDES

- Industry-leading warranties
- I-Beam & Truss Designs
- Natural ventilation
- Low cost per square foot
- Quick construction timelines
- Cost-saving foundation options
- Maximum usable space
- Climate-sensitive covers
- Permanent or temporary use
- Superior acoustics

Fabric Structures

- Ultra-durable fabric covers
- Natural light filters through, significantly reducing lighting costs
- Truss Arch or I-Beam frames
- Natural ventilation
- Cost-effective foundations that are temporary or permanent
- Custom and turnkey designs

FABRIC

METAL

Metal Buildings

- Steel cladding for maximum strength
- I-Beam construction
- Build to any size
- Traditional appearance
- Cost-effective
- Custom and turnkey designs

HYBRID

Hybrid Buildings

- Combines the best of fabric and metal structures
- Fabric roof provides natural lighting
- Steel sidewalls ensures strength
- Energy-efficient options

Versatile Foundation Solutions Allow You to Build Anywhere. From money-saving foundations that allow these buildings to be constructed just about anywhere to more traditional options, ClearSpan™ has the ideal foundation solution for any project.

CLEARSPAN FOUNDATION OPTIONS

- Poured Concrete
- Exclusive Helical Anchor System
- Pony Walls
- Blocks
- Containers
- Piers
- Concrete Pads
- ...and more

CONTAINERS

BLOCKS

ClearSpan offers their exclusive Helical Anchoring System.

This cost-effective foundation drills directly into the ground, eliminating the need for expensive excavation and traditional foundations. The anchors create a dependable hold that can last for decades, while also allowing the structure to be conveniently relocated and reconstructed as needed.

WARNING: Cancer and Reproductive Toxicity • P65Warnings.ca.gov

Attractive, lightweight, virtually indestructible polycarbonate Double Door Kits are available in sliding and hinged style and are ideal for greenhouses, as well as residential, commercial and industrial use.

- Heavy-duty frame, made from 16-gauge, 1.5" square, USA-made, triple-galvanized steel tubing, holds durable 8 mm UV-stabilized polycarbonate panels.
- Double doors measure 48"W x 92"H each.
- Energy-saving qualities. Screen out undesirable heat during summer months, yet retain internal heat during the cold winter months.
- Natural source of sunlight. Polycarbonate allows 83% light transmission, with no extreme heat or glare.
- Polycarbonate offers superior heat retention, resists wind, hail and vandalism and comes with a 10 year warranty.
- Ideal for repair and maintenance garages, car washes, dealerships or anywhere good light transmission is required.
- Comes complete with stainless steel hinges and latch and hardware for installation.

DOUBLE DOOR KITS

STK#	ITEM	EACH
105105	Hinged	\$839.00
105369	Sliding	885.00

Upgrade your greenhouse with our attractive, high-quality, pre-hung door.

- 36"W x 80"H hinged single door. Door with frame is 38-1/2"W x 81-3/4"H.
- Manufactured from Heavy Duty, powder-coated aluminum with 6 mm polycarbonate sections at both top and bottom for optimum light transmission.
- Flange, that provides tight seal against framework, stainless steel hinges and lever lock are all included.
- Create your own door frame opening using our 1.5" square galvanized tubing (102897), sold separately.

PRE-HUNG SINGLE GREENHOUSE DOOR

STK#	EACH
104706	\$399.00

Create the perfect entrance and exit for your greenhouse with these ultra-durable steel door kits.

- The ultimate in strength, durability and dependability, these doors ensure a long life.
- These kits include all the materials needed for installation, including door, j-channels, foam seals and more.
- Constructed from galvanized steel and fully injected with polyurethane foam that provides an insulation value of R-13.
- 1-3/4" thick.
- Features a fully roll-formed framed that is galvanized, and the baked on white paint won't wear down over time.
- The door sweeps make complete contact with the tapered threshold, and it is wrapped on three sides with Q-Lon weather stripping.
- 4" x 4" stainless steel hinges.
- A lever-lever door latch is included.
- Available in right hand and left hand outswing doors and double doors.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

WWW.GROWERSSUPPLY.COM 1.800.476.9715

Keep deer and other wildlife out of your garden and orchard areas with this "do-it-yourself" Fencing System.

Poly Mesh Netting

- Our 3/4" x 3/4" Poly Mesh Netting is lightweight, easy to install and ideal for our Deer Fencing System and as anti-bird screen.
- Manufactured from black UV plastic for long life and durability.
- Couple with our Deer Fence System Accessories on, sold separately for an effective, low-cost solution to your deer problems.

- When using our 19-gauge, 1.05" OD galvanized 6', 8' or 10' fence posts (105368, 104573 & 1055123), we recommend installing at a maximum of 6' to 10' apart. Use our 2' Ground Post (104543) and Driver (104545) for easy installation. Insert ground post 2' into ground. Place fence post inside it. Finish off each post with our 3/4" Schedule 40 PVC End Cap (WF2990). We recommend our Corner Post Assembly when using our galvanized fence posts. Ask your National Account Manager for details. Our Fiberglass Fence Posts are available in 6' and 8' lengths, designed for long life and are an excellent alternative. Manufactured from E-glass fibers that allow for flexing without breaking. Each fiber is UV protected on both interior and exterior. Flexible as bamboo, but will not rot or fray. Strong as steel, but will not rust. Priced per post, sold in bulk-packaged quantities of 10. We recommend installing Fiberglass Fence Posts at a maximum of 6' to 10' apart. Ground Posts are not needed when using Fiberglass Posts.
- Use either galvanized steel (AR1030) or stainless steel (AR3030) 1/8" 7 x 7 cable as a guide wire at top to support your deer fence. 1/8" cable clamps, either galvanized (AS1002) or stainless steel (AS1026) are required.
- 4" UV-resistant black nylon cable ties (112047) hold the cable to the fence along the top. 8" UV-resistant black nylon cable ties (112057) hold the fencing to the posts. Both are strong and durable and will last for many years.
- Brightly colored Yellow Flagging Ribbon (LJ7802) tied to your fence will warn deer of new barrier.
- 1-1/4" stainless steel fence staples (FA3390) hold the fencing to the trees surrounding the area to be protected. No rusting.
- Use our 12" heavy-duty ground staples (104544), spaced closely, to hold netting firmly to the ground. This will prevent wildlife pests from forcing their way under and will keep your birds from making their way out.

Pestrap™ Insect Traps are an easy and cost-effective way to monitor and control pests.

- A crucial factor in effective integrated pest management. These yellow and blue cards attract and trap potentially harmful insects before they can cause serious damage.
- Utilizes an extremely sticky adhesive that is non-toxic.
- Grids enable quick, easy and accurate monitoring.
- Blue or yellow cards allow you to target specific pests.
- 3" x 5" traps are ideal for monitoring greenhouse conditions to avoid pest damage. Use one to three traps for every 1,000 sq. ft.
- 4" x 10" traps allow you to monitor and control pests. Use one trap for every 500 sq. ft. for monitoring and ten traps for every 1,000 sq. ft. for control.
- Disposable and pesticide free.
- Ideal for aphids, leafminers, flea beetles, gnats, thrips, whiteflies and more.

All-natural deer repellent offers year-round protection.

- Ideal for landscapers, professional gardeners and home use.
- Highly effective, completely organic, biodegradable granular formula that contains no harmful chemicals or toxins. Safe for you, the animals, your family and pets.
- No mixing or spraying needed. Granular—just sprinkle.
- Repels by an odor that stimulates a strong fear-based response with deer, yet there is no unpleasant odor to humans.
- Rain resistant and can be used throughout all seasons, even in snow.
- Organic nutrients provide and promote enhanced plant growth.
- Costs less per sq. ft. of protection than any other deer repellent on the market.

AGRICULTURAL

State-of-the-art, solar-powered unit is guaranteed to keep out all nighttime predators.

- Maintenance-free, solar-powered units require neither batteries nor electricity.
- Units are completely sealed, protecting against moisture and are high/low temperature resistant.
- Red flashing light automatically turns on at dusk and off at full daylight.
- Concept is simple, but it works. Predators believe the flash to be the eye of another creature and feel threatened, so they stay away.
- Multiple unit locations are most effective. Your knowledgeable National Account Manager will be happy to recommend what is best for your setup.

NITE GUARD SOLAR PREDATOR PROTECTOR

STK#	EACH
106126	\$39.95

This low-profile electronic pest repeller uses quiet ultrasonic sounds to evict mice, bats, spiders, cockroaches and other crawling insects.

- This highly effective unit disrupts the pests' habitat through ultrasonic and sonic sound waves, affecting their feeding and communication habits, forcing them to leave the area.
- Intended for indoor use only. Ideal for kitchens, garages, basements, workshops, barns, boats, warehouses, restaurants, stores, sheds and attics.
- Safe for use around humans, including children, and around household pets such as dogs, cats, birds and reptiles.
- Two-speaker system doubles the effectiveness.
- Easy to use. Just plug the system in.
- Coverage: Up to 3,500 sq. ft.

Ideal for cooling systems and automatic water system control.

- Solenoid operator is on a swivel mount.
- Working pressure: 150 PSI maximum, 20 PSI minimum.
- Not for hot water use.
- 1" F inlet and outlet.
- Molded from 6/6 glass-filled nylon.
- Operation type: Normally closed.

113723

- 24 V AC Solenoid has a pressure range of 20 PSI to 150 PSI and a 0.2 GPM to 40 GPM. It has a 1" female inlet and outlet, and its durable, high-grade construction and rugged diaphragm make it ideal for greenhouse, residential and light-commercial applications.

The Iron Might is great for ponds, spas and more. It is designed to consume little power and run 24/7.

- Operates on only 1.3 amps at 115 V.
- Pump has a side discharge for optimum flow and provides a flow rate of 40 GPM.
- 1-1/2" Intake and Discharge. 1/15 HP.
- A 1-1/2" union assembly is available (113724) and should only be hand tightened.
- 1/15 HP.

Dolphin Pumps are designed and manufactured for maximum efficiency and minimum power consumption, allowing for cost-effective and worry-free operation of your hydroponic system.

- New high-performance wet end designs.
- Continuous-duty, weather-proof motors and dual-sealed bearings.
- For fresh water applications only.
- For indoor or unprotected outdoor use.
- Anti-vibration pump pad and new super seal unions included.
- Corrosion resistant.

Premium Efficiency Diamond Aqua Sea 9250 & 9500 (111146 & 111147)

- High head, low current draw.
- 111146: 115 V, 50/60 Hz, 1 HP, 9,250 GPH.
- 111147: 230 V, 50/60 Hz, 1 HP, 9,500 GPH.
- 1-1/2" supply and discharge.
- 111146 comes with supply cord. 111147 is un-corded.
- 2 year manufacturer's warranty with 10 year free extended service guarantee.

Super Amp Master 7200 (111148)

- Designed to consume the lowest amount of energy per gallon pumped.
- Flow rates may be dialed back by a ball valve with no harm to pump. Electric current draw drops as flow is reduced.
- Super flow turbine-style impeller. Stainless steel crane seal for superior seal life.
- 230/115V.
- 2" supply and discharge.
- Comes with supply cord.
- 1 year manufacturer's warranty with free 10 year factory service guarantee.

Super Aqua Sea 12500 (111149)

- Built to consume the lowest amount of current for each gallon pumped.
- Premium energy efficient designed motor that is built to consume the lowest amount of current for each gallon pumped.
- 115 V, 3 HP, 50/60 Hz, 12,500 GPH.
- Comes with supply cord.
- 2" supply and discharge.
- 1 year manufacturer's warranty and free 10 year factory service guarantee.

EZ-FLO Hose Bib & Drip Systems feed flowers, trees and shrubs without the need to constantly refill the tank.

- Ideal when you don't have a dedicated irrigation system, or when you want to separately address certain types of plants that require specialty fertilizers and supplements.
- Hose Bib Systems can be used by homeowners, nurseries or professional growers by simply attaching them to standard water faucets.
- Tanks are manufactured from Heavy Duty polyethylene plastic that is not designed to withstand constant water pressure. They need to be depressurized after each use to ensure long service life.
- There are many end devices that can distribute fertilizer and supplements, making this a very flexible system to use.
- Maximum pressure limit is 50 PSI in operating mode.
- Systems are available in two tank sizes: 3/4 gallon and 2 gallon.
- EZ-FLO ensures that the proportion of fertilizer or supplement to water remains constant from the beginning of the cycle until the tank is depleted.
- Units have an adjustable cap with four basic settings, relating to the amount of fertilizer/supplement mixed with water.
- Coupling connectors are available in 1" with socket x socket connections and 3/4" bushing adapter. These PVC Schedule 40 couplings are 1/4" nylon barbed tubing that are used to connect the EZ-FLO System to the irrigation flow line (1/4" flexible tubing is provided with each system).
- A must-have for your system is the Hose Vacuum Breaker, which prevents backflow into your drinking water using a brass anti-siphon bulb with stainless steel spring and screw.
- Capacity:
107718 5 pounds water soluble
112246 10 pounds water soluble.
- Gallons to empty setting ratio:
107718:
(Slow) 1,000:1 - 750
(1) 500:1 - 375
(2) 250:1 - 188

Fertilizing has never been easier. Heavy Duty Brass Siphon Mixer fertilizes as you water.

- This accurate proportioning device has been exclusively designed for small-scale growers to dispense fertilizers, insecticides, fungicides and other water-soluble chemicals through a hose.
- Heavy Duty brass construction, with backflow preventer.
- Average dilution ratio: 16:1.
- Quickly and easily dispense one gallon of concentrate in as little as 5 minutes or less.
- Requires 35 PSI, minimum.

MixRite Horticultural Injectors ensure precise dosing continually and economically.

- Ideal for fertigation, water treatment, supplementation, disinfection, line cleaning, installations and pH and EC control.
- Water-driven proportioning injector for pumping an additive into a water line at a consistent rate over varying water pressure and flow rate.
- Easy to install and maintain. No electricity needed. Highly chemical and UV resistant.
- Ensures that nutrients are applied where needed.
- On-demand dispensing eliminates waste.
- Spare Seal Kit included with every unit.

Fertilizer Injector Systems deliver a finely tuned fertilizer mix to keep vegetables, perennials, bedding plants and crops of all kinds thriving.

- The water-driven proportioning injectors automatically fertilize and maintain the proper pH every time you irrigate.
- These energy-efficient units do not require electricity.
- Injector boards allow you to purchase pre-mixed fertilizers and pH adjusters or mix your own custom solutions to address specific needs.
- Your choice of Single or Double Injector Systems. Single Injector Systems are ideal for all-in-one fertilizer mixes and feature one pump for fertilizer and one for pH adjustments. Double Injector Systems allow two-part fertilizer mixes to be utilized and feature two pumps for fertilizer and one for pH adjustments.
- Easy to set up and install. Simply attach the unit to where your water line enters the growing space.
- Spare seal kits are included.

Top-quality filter housings protect your equipment from damage due to water contamination.

- Industrial-quality Filter Housings.
- All housings NSF listed under Standard 42.
- Passes cyclic pressure test of 100,000 cycles from 0 PSI to 150 PSI line pressure without failure of housings.
- Passes 300 PSI hydrostatic test and 400 PSI burst test.
- Jumbo Blue™ housing manufactured from reinforced polypropylene with 1" inlet and outlet.
- Standard Blue housings manufactured from reinforced polypropylene with 3/4" inlet and outlet.
- Clear Bowl housings have reinforced polypropylene top with 3/4" inlet and outlet and SAN bowl.
- Pressure relief valve.
- Maximum PSI: 100.
- Maximum Temperature: 125°F.

Reliable Manual Plastic Disc Filters provide superior filtration with practically no maintenance necessary.

- Manufactured for increased chemical resistance.
- Highly effective multiple disc ring design captures and holds more debris.
- Cleaning is required less frequently compared to screen filters. Rings are easily removed for fast cleaning without the need for scrubbing.
- Both Replacement Ring Sets include discs, spine and spine extension.

2" Dual Lite Manual Disc Filter

- Flow range: 40 GPM to 110 GPM.
- 120 mesh. 130 micron.
- Maximum pressure: 115 PSI.
- 2" male inlet and outlets.
- Dimensions: 10-1/4"W x 16-15/16"L.
- Ensure easy placement into your new or existing plumbing with our Schedule 40 PVC 2" S x FPT Special Reinforced Union (111580), sold separately. This union features Buna-N O-ring seal and special reinforced stainless steel collar.
- Maximum pressure: 235 PSI at 73°F.

Granular Activated Carbon Filter Cartridges provide exceptional filtration and are a good option for high flow applications.

- Reduces bad taste and odors, as well as chlorine.
- Filters are designed for optimal absorption, and they feature a post filter that limits carbon fines.
- Improves drinking water by removing volatile compounds. Constructed from NSF-certified materials.
- These are a good option for point of use RO systems, whole-house filtration, commercial RO pretreatment and much more.

Drain Stop Plus by Senninger® has innovative three-in-one design.

- Specially designed for overhead irrigation to prevent draining from applicators when system is shut down.
- Protects plants beneath applicators from damage due to overwatering.
- Allows lines to remain full to help expedite system start-up time.
- Unique 3-mode design. Twist dial to select: Check-Open-Closed.
- Easy-clean feature for debris removal.
- High-impact, engineering-grade thermoplastic construction for durability.
- Flow: 0.25 to 5 GPH.
- Minimum opening pressure: 13.5 PSI.
- Minimum closing pressure: 3.5 PSI.
- Maximum operating pressure: 50 PSI.
- 1/2" MNPT inlet x 1/2" FNPT outlet.

Pressure Regulator Kit features integral stainless steel strainer.

112694

- Durable bronze body.
- Reinforced EPDM diaphragm and EPDM valve disc.
- 3/4" FPT inlet x 3/4" MPT outlet.
- Features integral stainless steel strainer.
- Handles inlet pressures up to 400 PSI and water temperatures up to 180°F.
- 10 PSI to 70 PSI.
- Compliant 2014 No-Lead Law.
- Less than 0.2% lead when used with solder and flux.
- Less than 0.25% lead when used with wetted surfaces of pipes, pipe fittings and fixtures.
- Not for use with potable water.

111316

- Includes our 10 PSI to 70 PSI pressure gauge and a T-fitting for a complete pressure regulator kit.

116272

- Includes our 0 PSI to 20 PSI pressure gauge and a T-fitting for a complete pressure regulator kit.

3/4" PRESSURE REGULATOR

STK#	ITEM	EACH
111316	Pressure Regulator Kit	\$99.95
116272	Pressure Regulator Kit	115.95
112694	Regulator only	87.95

Designed for high ammonia environments.

- Compact iron body pressure regulator.
- Range from 0 PSI to 20 PSI. Factory set at 5 PSI.
- Ethylene propylene diaphragm.
- Initial pressure up to 300 PSI.
- Suitable for hot or cold water to 180°F.
- Less than 0.2% lead when used with solder and flux.
- Less than 0.25% lead when used with wetted surfaces of pipes, pipe fittings and fixtures.
- Only for use where an iron body is code compliant.

3/4" PRESSURE REGULATOR

STK#	EACH
112691	\$79.95

Reduces and regulates high inlet pressures.

- Features threaded union inlet connection with gasket-FPT.
- FIP outlet.
- Stainless steel strainer.
- Reinforced diaphragm.
- Back-pass check feature allows for thermal expansion.
- Fully adjustable from 10 to 70 PSI.
- Compliant 2014 No-Lead Law.
- Less than 0.2% lead when used with solder and flux.
- Less than 0.25% lead when used with wetted surfaces of pipes, pipe fittings and fixtures.
- For use with potable water.

1. Lay our Swan® Soaker Hose in place and secure with our Fabric Securing Staples, sold below. Soaker Hose is available in either 50'L 3/8" ID coupled or 250'L 3/8" ID uncoupled. Both come with a 7 year warranty. Soaker Hose targets the specific area that needs watering, offering precise, gentle soaking and eliminating water waste.

2. Place Weed Guard Ground Cover over the hose and secure with our Fabric Securing Staples. Our 3 oz. per sq. yd. Ground Cover is manufactured from UV-resistant black polypropylene and has a long life expectancy. Fabric Securing Staples are made of 11-gauge steel wire, are 6"L with a 1"W crown.

3. Make slits in the Weed Guard, which is pre-marked every 12" for easy plant alignment, measuring and cutting.

Easy Water 1-2-3 System allows water, nutrients and air to pass through, but stops the weeds. Increase your vegetable yield up to 75%.

- Weeds compete with vegetables for water, light and nutrition. By taking control of these weeds, your production will reach full potential.
- Just sit back and enjoy your bountiful harvest, with no weeding or hand watering.

Simplify your irrigation and keep it functioning properly.

- The Hose Bib Assembly connects water or nutrient solution supply hoses to the supply header to filter out debris and sediment and ensures that water pressure stays within the proper PSI.
- Assembly features 3/4" Brass Adapter, Y-Filter, Shut-off valve, (2) PVC Tee Fitting, (2) 3/4" PVC Bushing, 100 PSI Pressure Gauge, (2) 3/4" Nipple Adaptor, Pressure Regulator, 15 PSI Pressure Gauge, 3/4" Adaptor, 3/4" Washer and Thread Sealing Tape.
- If reducing down to 1/2" tubing, additional fittings WF2070 and WF2372 are required and sold separately.
- Maximum flow rate: 5 GPM.
- For use with streamline 636 drip tape only.

HOSE BIB ASSEMBLY

STK#	EACH
113886	\$64.95

LAWN & GARDEN

Simple, economical and efficient watering method saves time and labor costs.

- Mats use a capillary action to hydrate plants from the bottom up, enabling water to reach the root zones.
- Plants grow more uniformly in size and have no leaf spotting as when they are watered from above.
- Ideal for use on your benches, flooring or ground.
- 100% needle-punched polypropylene, non-woven filter fabric is resistant to shrinking, tears, soil chemicals, puncture, ultraviolet exposure, rot and mildew.
- Lightweight, easy-to-handle matting cuts easily and does not fray.
- Sold in 100 ft. lengths.

How to get started:

1. Ideal on your bench top or greenhouse flooring. Also can be used on the ground with our 1" x 3" Recycled Plastic Lumber as side framing.
2. For best results, your bench, ground or flooring area should be as level as possible.
3. Cover area with our 6 oz., 12 mil mat underliner, black side up. This allows the water to spread, but prevents dripping and water loss due to evaporation. Underliner will also extend the life of your matting and makes the system easy to clean.
4. Lay the Capillary Matting over the underliner. Overlap or tightly join any adjacent pieces. Do not allow the matting fabric to hang over the edges.
5. We suggest soaking the fabric prior to setting out your plants. This ensures maximum capillary contact immediately. If possible, keep mats wet at all times. If not, wet at frequent intervals.
6. Works best with plastic pots.
7. Shown here using our Soaker Hose, available coupled in 50 ft. length and uncoupled in 250 ft. length.

Drain Stop Plus by Senninger® has innovative three-in-one design.

- Specially designed for overhead irrigation to prevent draining from applicators when system is shut down.
- Protects plants beneath applicators from damage due to overwatering.
- Allows lines to remain full to help expedite system start-up time.
- Unique 3-mode design. Twist dial to select: Check-Open-Closed.
- Easy-clean feature for debris removal.
- High-impact, engineering-grade thermoplastic construction for durability.
- Flow: 0.25 to 5 GPH.
- Minimum opening pressure: 13.5 PSI.
- Minimum closing pressure: 3.5 PSI.
- Maximum operating pressure: 50 PSI.
- 1/2" MNPT inlet x 1/2" FNPT outlet.

Ensure that every plant in your irrigation system receives the same amount of water and fertilizer, regardless of location, for a uniform, high-quality crop. Netafim™ offers the highest level of technology available.

- Patented pressure differential system maintains uniform flow rate at different inlet working pressures, ensuring exact distribution of water and nutrients.
- Check valve feature in drippers ensures that irrigation lines stay full and do not drain into the lowest lying plants.
- We offer all of the pieces necessary to create your customized irrigation system. We recommend our 1/2" (110747A) or 3/4" (110741A and 111627A) Polyethylene Tubing, sold separately, for use as your supply line.

Woodpecker PC & PC Jr. Drippers (110412, 110405, 110406, 110409, 110410, 110411)

- Turbonet™ Technology improves dripper performance by widening the tooth pattern and maximizing the flow path velocity, preventing contaminants from clogging the dripper.
- Available in three flow rates: 0.5 GPH, 1.0 GPH and 2.0 GPH.
- Manufactured from high-quality polyethylene. Color-coded bases for easy GPH recognition.
- Recommended operating pressure: 35 PSI. Recommended filtration: 155 mesh.
- Priced per Dripper. Each Dripper has a minimum order quantity of 10.

Dripper Shut-Off Cap (110404)

- Easy-to-install, snap-on cap lets you turn off irrigation at a specific dripper.
- Priced per cap, with a minimum order quantity of 10.

Manifolds (110402, 110400, 110401)

- Flat manifolds are ideal for field applications because the low-profile design and durable construction resists damage from field workers.
- Flat 2-Way Manifold (110402) allows for two dripper stakes. We recommend combining with our 1.0 GPH Woodpecker PC Drippers.
- Flat 4-Way Manifold (110400) allows for four dripper stakes. We recommend combining with our 2.0 GPH Woodpecker PC Drippers.
- Combine Stackable 4-Way Manifold (110401) with Flat 2-Way or 4-Way Manifolds to create additional configurations.
- Priced per Manifold. Each Manifold has a minimum order quantity of 10.

SuperFlex™ UV White Polyethylene Tubing

- Available in 1/8" (110408A) and 1/4" (111046A).
- Ideal for use with drippers, dripper weights, dripper stakes and spray stakes on trees, shrub beds, potted plants and hanging baskets.
- UV and acid-resistant polyethylene resin material withstands the extremes of hot and cold weather much better than vinyl.
- Compatible with all brands and models of drippers that accept either 1/8" or 1/4" micro tubing.
- Reflective, opaque white tubing prevents the growth of algae and produces cooler water temperatures, enhancing plant growth.
- Sold only in increments of 100' or full 1,000' rolls. 1,000' rolls are priced per ft.
- Barb Connector, Barb Tee and Micro Valve allow you to connect two lengths of micro tubing. All sold separately.

Slimline EZ Close™ White Dripper Weight (110413)

- Ideal for hanging basket growers who need to reduce or eliminate hand-watering labor costs.
- One-hand shut-off feature lets you turn off watering to individual baskets, preventing water and fertilizer waste.
- When irrigation lines are more than 36"L, use with Woodpecker PC Drippers (110409, 110410 or 110411).
- Priced per Weight, with a minimum order quantity of 10.

Angled Arrow Dripper Stakes (110403 and 110407)

- Available in two sizes: 3-3/4"L for 4" to 5" pots, as well as hydroponic grow bags and blocks, and 6-3/8"L for larger pots.
- Applying water directly to pots with Arrow Stakes helps prevent the spread of disease and reduces the need for spraying, as pesticides are not washed off by daily watering.
- Priced per stake. Each Stake has a minimum order quantity of 10.

1.0 GPH Angle Barbed Dripper Stake (110745)

- Unique flow channel down the length of the stake directs water into the container. Features pointed end for easy container insertion.
- We recommend pairing with our 1 GPH Woodpecker PC Jr. (110405) or PC Dripper (110410).
- Priced per stake.

3.2 GPH Spray Stake and Assembly (110415 and 110416)

- Easy to install. Simply pair 3.2 GPH Spray Stake with 36" Dripper Tube Assembly, each sold separately, and connect to supply tubing.
- Spray pattern angles slightly downward to spray the soil for uniform watering and maximum water retention.
- Simple, side-mounted, shut-off mechanism prevents water waste and accidental close-offs.
- Priced per item. Each item has a minimum order quantity of 10.

3 mm Flex Tube Adapter (110414)

- Converts Nipple Outlet Dripper to Barb Outlet Dripper.
- Priced per adapter, with a minimum order quantity of 10.

Our tubing is manufactured to the highest standards for greenhouse, nursery and agricultural applications.

- Ideal for tree, vine, permanent row crop, greenhouse and nursery applications. Use with riser lines or in subsurface, surface and vine-suspension applications.
- Manufactured from the finest low-density polyethylene resin available.
- UV and acid-resistant polyethylene resin material withstands the extremes of hot and cold weather much better than vinyl.
- Reflective, opaque white tubing prevents the growth of algae and produces cooler water temperatures, enhancing plant growth.
- Available in 1/8", 1/4", 1/2" and 3/4" sizes.

SuperFlex™ UV White Polyethylene Tubing

- Available in 1/8" (110408A) and 1/4" (111046A).
- Ideal for use with drippers, dripper weights, dripper stakes and spray stakes on trees, shrub beds, potted plants and hanging baskets.
- Compatible with all brands and models of drippers that accept either 1/8" or 1/4" micro tubing.
- Sold only in increments of 100' or full 1,000' rolls. 1,000' rolls are priced per ft.
- Barb Connector, Barb Tee and Micro Valve allow you to connect two lengths of micro tubing. All sold separately, below.

1/2" and 3/4" Polyethylene Tubing and Accessories

- 1/2" Black Polyethylene Tubing (110747A): 0.600" ID/0.700" OD. Maximum working pressure: 51 PSI. Sold only in 100' increments or full 1,000' rolls. 1,000' rolls are priced per ft.
- 3/4" Polyethylene Tubing (Black-110741A, White-111627A): 0.820" ID/0.940" OD. Maximum working pressure: 58 PSI. Sold only in 100' increments or full 1,000' rolls. 1,000' rolls are priced per ft.
- Joiners (110732/110728), Elbows (110733/110729) and Tees (110734/110730): Connect multiple lengths of polyethylene tubing. Double barb for increased retention and leak-proof seal.
- 3/4" Barb x MPT Adapter (111074): Connects 3/4" polyethylene tubing to FPT fittings.
- Take-Off Fittings and Grommets (111597/111596/111599/111598): An improved method of connecting low-pressure irrigation tubes and drip lines to polyethylene tubing and PVC mainlines. Use 16 mm fitting with 1/2" polyethylene tubing and 19 mm fitting with 3/4" polyethylene tubing.
- Ratchet Clamps (111697/111698): Ensure secure connection between barbed fittings and tubing.
- End Plugs (110735/110731): For closing ends of polyethylene supply tubing.
- 3 mm Punch (110743): For installation of Woodpecker PC and PC Jr. Drippers.
- 3 mm Goof Plug (110762): Plugs holes from 3 mm Punches. Sold in bags of 10.

Our Netafim™ Field Drip Irrigation Components feature Streamline™ 636 Drip Tape with Turbonet™ Technology for increased flow path velocity, improving dripper performance.

- Ideal for a wide variety of row crops, including tomatoes, melons, peppers and other vegetables.
- We offer all of the pieces necessary to create your customized field drip irrigation system. We recommend our 1/2" (110747A) or 3/4" Polyethylene Tubing (110741A and 111627A), sold separately for use as your supply line.

Streamline 636 Drip Tape (110742C)

- Turbonet™ flow paths have wider tooth patterns, maximizing velocity and eliminating clogging due to debris.
- 8 mil thickness for seasonal or multi-seasonal use, surface or shallow (up to 8") burial.
- 12" dripper spacing.
- 0.4 GPH/100' at 0% slope at 10 PSI.
- Manufactured from high-quality polyethylene, with injection-molded drippers.
- Priced per foot. Sold only in 1,000' increments.

Twist-Lock Drip Tape Connectors (110736-110739)

- Unique design provides a secure, leak-proof connection. Larger threads for easy and fast hand installation. Chemical, UV and heat resistant.
- Twist-Lock 630 Series TWD x 0.4" Barb (110736): Connects drip tape to polyethylene supply tubing.
- Twist-Lock 630 Series TWD x 3/4" MPT Adapter (110772): Connects drip tape to garden hose. Use with 3/4" x 3/4" FGH x FPT Brass Garden Hose Fitting (112062), sold separately on pg. 220.
- Twist-Lock 630 Series Tee (110737): Connects three lengths of drip tape to create perpendicular rows. For areas that are hard to reach from the supply line or for running dripper lines around obstacles.
- Twist-Lock 630 Series Coupling (110738): For repair and connecting two sections of drip tape.
- Twist-Lock 630 Series End Plug (110739): For closing end of drip tape row.
- Twist-Lock 630 Series 0.400" Barb with Valve (110740): Connects drip tape to supply header tubing. Valve allows you to turn irrigation on and off at supply header for specific dripper line.
- 8 mm Punch (110746): For installation of Twist-Lock 630 Series Barbs.

This Hose Bib Assembly allows growers to easily filter water and maintain proper PSI, leading to a better functioning system.

- A great way to connect water or nutrient solution tanks to the supply header. The assembly helps to filter debris and sediment.
- Ensures water pressure stays within the proper PSI.
- The assembly features one 3/4" brass adapter, one Y-filter, one shut-off valve, two PVC tee fittings, two 3/4" PVC bushings, two 100 PSI pressure gauges, one pressure regulator, one 3/4" brass fitting, one 3/4" adapter, one 3/4" washer, one screw clamp and thread sealing tape.

- Maximum flow rate of 5 GPM.
- For use with streamline 636 drip tape only.

Create the perfect irrigation system with this Drip Tape Kit.

- Drip irrigation system with battery operated timer and filter.
- Kit includes timer, tubing, valves and 1000' of tape for custom drip irrigation systems.
- Hooks right to garden hoses.
- Enough tape and fittings to do 10 rows at 100' or 15 rows at 65'.
- Drip tape has 12" dripper spacing.
- 5 GPM max flow rate.
- Kit includes: 112244 Digital Timer, 113886 Hose Bib Assembly, 110738 Coupling (x5), 110730 Tee (x2), 110728 Joiner (x5), 110746 8MM Punch, 110742C 1,000' Drip Tape, 110739 End Plug (x15), 110729 Elbow (x2), 110731 Plug (x2). 110740 Twist Lock with valve (x15), 111627A 100' 3/4" Hose in white.

Evaporative Through-Wall Coolers provide economical and trouble-free cooling that will provide long-lasting comfort with minimum maintenance.

- These window-mounted coolers offer more cooling power at minimum energy costs.
- Metal cabinet construction and polyester appliance finish for protection.
- Comes fully assembled, plug and play. 115 V.
- All Evaporative Through-Wall Coolers include 2-speed motor, pump, installation kit and Natural Aspen pads.
- 10 year warranty against leaks due to rust out. 1 year warranty on all parts.

AquaCool® Evaporative Cooling Systems are the most durable, dependable and easy-to-use systems on the market today.

- These systems offer a natural method of cooling and moisturizing the air.
- Available in twenty stock sizes to accommodate all needs. Custom sized systems are also available.
- Systems come complete with Evaporative Cooling Pad, aluminum distribution (top and bottom), aluminum end panels, 1/3 HP submersible sump pump and plumbing kit.
- Evaporative Cooling Pads are designed to achieve the most effective and efficient evaporative cooling possible. These corrugated, cellulose pads are crafted from 100% premium-grade, virgin kraft paper and offer maximum stability and long life. Consistent in performance, Evaporative Cooling Pads are highly absorbent and easily cleaned. Replacement Evaporative Cooling Pads are available below. Ask your National Account Manager about special truckload pricing.
- Proven to be one of the most cost-effective methods for maintaining proper growing conditions, healthy poultry, hog, dairy, livestock and warehouse buildings. These systems cost 50% less than traditional A/C systems, can be used anywhere and will cool the same sized area. You will see a 16° to 20° temperature drop.

Evaporative Cooling End Wall Framing simplifies installation.

- Holds evaporative cooling systems securely in place.
- Reduces installation time.
- Frames come sized to each specific system.

ORDERING: EVAPORATIVE COOLING SYSTEM

1. Total CFM of Required Fans = Volume of Building x 1.3 (air exchange per minute).

To calculate building volume, use the following formula, remembering to add the gable area into the end wall area: Total Volume of Building = End Wall Area x Length of Building.

2. Total Area of Cooler = Total CFM of Required Fans/400 (400' per minute).

To calculate the area of the cooler required, size the cooler by selecting a suitable height and length to equal the area. Round cooler size to even 1 ft. multiples in height and length.

Reservoir size for coolers = 1 gallon per sq. ft.

3. Minimum water flow rate is 0.8 GPM per sq. ft. for 6" system.

Cool-N-Klean is a fantastic cleaner, and it's the perfect solution for cleaning evaporative cooling systems and water walls.

- A high-foaming, acidic cleaner that works well with cool cell pads and hard environmental surfaces. It's considered a breakthrough in improving cool cell pad life and cooling efficiency.
- Helps to control scale and organic fouling.
- For water pipes, cool cell pads and hard environmental surfaces. Perfect for greenhouses, as well as poultry, swine and dairy operations.
- Approved by evaporative cooling pad manufacturers.
- 1 gallon.

Breathable Wall Light Traps and our innovative Blackout Kits maintain controlled airflow in your greenhouse or grow room without sacrificing blackout environments.

The Breathable Wall Light Traps

- Ideal for any light deprivation needs.
- Allows for nearly 100% airflow, while blocking all light, creating a well-ventilated, blacked out environment.
- Enables you to build with blackout material. Section off rooms, create knee walls or use on exterior walls to prevent light from entering your grow space.
- Call one of our greenhouse specialists for custom sizes.
- This kit is available preassembled. To order an assembled kit, add A to the end of your STK#.

Blackout Fan Kit

- Includes Breathable Wall Light Traps.
- 113393, 113394, 115595 and 113419 comes with ValuTek™ Slant Wall Exhaust Fans. The heavy-duty fans are galvanized to fight corrosion and ensure a long life. The energy-efficient motor is completely enclosed and features solid motor mounting for quiet operation.
- 116114 utilizes the Canarm Exhaust Fan with Aluminum Louver. It features a totally enclosed motor and heavy-gauge aluminum blades within a rugged steel housing.
- This kit is available preassembled. To order an assembled kit, add A to the end of your STK#.

Blackout Shutter Kits

- Includes Breathable Wall Light Traps and adapter plenum.
- Comes with motorized Keenan and Meier 3100 Series shutters.
- Dependable and durable construction for a long life.
- Can be used for intake or exhaust, with either manual or thermostatic controls, which are sold separately.
- Includes a 120 V AC motor.
- 115424 & 115595 includes adapter plenum.
- This kit is available preassembled. To order an assembled kit, add A to the end of your STK#.

Blackout Fan Kits allow you to maintain a fresh environment for your crops without any light leaks.

- These high airflow capacity fan kits are available in 42" and 53" sizes.
- Fans are outfitted with compact light traps that promote proper air exchange without allowing light to enter the structure through the fan.
- Kits feature mechanically operated shutters that feature gaskets that guarantee full closure.
- Fans run on a 1-1/2 HP, 115/230 V motor.
- Low maintenance and durable design. The bottom panel has four holes that allow water and moisture to drain.
- Kits are available with and without light traps for growers that already have light traps.
- Kits come assembled

Remove and control condensation while improving air quality. These high-performance exhaust fans are designed for use in horticultural and agricultural applications, as well as factories, warehouses, garages, attics and restaurants.

- Highly efficient shutter style exhaust fans offer improved cooling and ventilation for superior air circulation.
- Rounded guard design prevents excessive vibration and adds rigidity for quiet operation.
- OSHA-spaced guards feature industrial gray polyester powder coating.
- Heavy Duty aluminum shutters have reinforced corners for increased reliability.
- Weather stripping on louvers provides maximum seal and prevents rattling.
- Sizes 12"-24" are pre-wired with 9' grounded cord. 115V.
- 12"-20" fans have 3 speeds and 24" fans have 2 speeds. Variable speed capable models available in all sizes.
- Motor type: TEAO, IP55 rating. Fans are UL 705 certified.

Premium Solar Vent Opener can lift up to 65 lbs.

- Constructed from long-lasting stainless steel, brass and aluminum.
- Adjustable for different opening heights and mountable two different ways, taking up as little space as possible within your greenhouse.
- The volume-expanding wax within the hydraulic cylinder will endure any temperature (hot or freezing), working independently of the power grid for continuous temperature monitoring.
- Recommended for use in temperatures up to 140°F.
- 2 year manufacturer's warranty.
- It is recommended that the vent cylinder be removed during the winter months.

SOLAR VENT OPENER

106119MS	\$185.95

Support passive ventilation and save money on a regular basis with this greenhouse guillotine vent.

- Allows air to naturally flow into greenhouses, creating a cooler environment with fresh air.
- Runs on a motor that allows growers to open or close the vent at any time.
- Quiet operation.
- Constructed from 8 mm twin-wall polycarbonate and an easy-to-operate motor.
- Can be installed on existing greenhouses.
- Support kit available for hanging insect netting.
- Available in 4' and 5' heights, as well as 15', 20', 25', 30' and 35' widths.

Match these End Wall Vent Kits with an evaporative cooling system to create an environment where crops can flourish.

- Promote healthy airflow and consistent temperatures.
- These kits allow you to customize your GrowSpan growing structure to meet your exact environmental needs.
- Automated design reduces labor requirements and simplifies your operation.
- Easily integrate into GrowSpan S500, S1000 and S2000 greenhouses.
- End Wall Vent Kits work great with our 8mm Twin-Wall Polycarbonate.

Solar-Powered Vent Opener keeps plants healthy.

- Allows solar-powered control of either top or side mounted window vents.
- Adjustable opening temperature of 60° F to 75° F and an 18" maximum opening.
- Soundless wax motor reacts to solar sensors, opening vent just enough, allowing for a quieter, more relaxing environment.
- Works independent of power grid to continuously monitor greenhouse temperature.
- Recommended for use in temperatures up to 120° F.
- Lifting capacity: 15 lbs.
- It is recommended that the vent cylinder be removed during the winter months.

Achieve maximum ventilation on hot and humid days with a high tunnel roof vent.

- Unique roof-installed ventilation system provides a chimney-effect movement of hot air out of the tunnel.
- Vent is constructed of a durable 8 mm clear polycarbonate twin-wall panel mounted on a sturdy, white powder-coated aluminum frame that measures 32" x 17". (Actual inside opening is 30" x 15")
- Opens and closes automatically within preset temperature ranges.
- To maximize ventilation, the vent should be installed as high on the roof as possible.
- We suggest a vent be placed approximately every 15 ft. to 20 ft. to reach the ultimate effective roof ventilation.
- It is recommended that the cylinder from the automatic opener be removed during the winter months.
- Installation of panel may require some field framing to support panel if used in a nonrigid panel installation.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

Link4 iGrow Controllers are the latest in greenhouse environmental automation. Control and integrate a variety of equipment in your greenhouse with one easy-to-use system.

- Precision controls allow you to improve crop quality and lower energy costs.
- Exclusive 2 year manufacturer's warranty and 24/7, 365 days per year support.

iGrow 800 Integrated Panels with Link 4 Standard (116417)

- The iGrow 800 Controller and a UL-approved contactor panel in one. Pre-wired units eliminate wiring errors in the field.
- Features an extra output, so instead of eight, growers can run nine different pieces of greenhouse equipment from this controller.
- Get all the benefits of the iGrow 800 Controllers, plus easier installation with reduced costs.
- Panel features a VC option for controlling vents and curtains, as well as the S module, which allows you to monitor your equipment from a computer, smartphone or iPhone.
- Comes in a Nema 4 enclosure, which is made from powder coated white steel.

iDrive 300 Motor Controller (112824)

- The iDrive 300 Motor Controller is compact, powerful and versatile motor controller designed to operate vents, curtains, 2 speed fans and other multi-function motor applications.
- Designed to work with nearly any industrial motor you'll find out there, the iDrive 300 gives you the ability to interface your motor to any common electronic controller, thermostat or manual control.

iDrive 150 DCP™ Dual DC Motor Controller (116252)

- Based off of the iDrive 300™, this controller features similar components and design, ensuring users get a controller of the highest quality.
- Several features make this controller ideal for DC motors, including voltage adjustments for line losses, IR compensation, torque controls and more.
- Single phase, 120 VAC and a 15A fuse to provide internal electronic protection.
- 24 VDC, which is variable from 0 VDC – 36 VDC.
- Three wire limit switch design.
- Power relays.

iGrow 1800 Controller (117301)

- Ideal for large greenhouses and operations.
- The unit has 12 indoor outputs with expansion capability.
- iGrow 1800 special features include PC configuration, sensor back up, anticipatory heating and cooling and more.
- Multi button keypad allows the unit to be easily programmed and operated.
- Control capabilities include alarm via Linkconn software, heating systems, pumps, CO2 injectors, fans, fertigation injectors, lights, irrigation, louvers, vents, shade, cooling systems, fog systems and much more.
- The iGrow 1800 also has advanced settings that allow growers to set eight daily set points, flexible conditional controls, intelligent irrigation, start delays, advanced pump control, positive pressure control, user differentiated access control and daily light integral lighting mode.
- Linkconn software sold separately.

Link4 Controller Accessories

- Indoor Digital Temperature and Humidity Sensor (111142): Upgrade for iGrow 800 Controllers. Offers high precision for relative humidity and temperature readings. Housed within a protective shield that safeguards against radiation and reflected heat. Measures -30°F to 150°F and 0% to 95% relative humidity.
- Weather Station (112231): Get the most accurate reading of weather conditions right on your iGrow Controller. Includes high-precision sensors for light (0 to 2,000 W/m2), wind speed (3 to 175 mph) and direction (+/- 2%), temperature (-30°F to 150°F) and rain (0.01"). Housed in specially designed enclosures and radiation shields, it is able to detect the most minute changes in weather conditions to full-blown storms.
- 112231 is compatible with 800 series controllers.
- iPonic D.I.S.M. Digital Integrated Sensor Module (115467) effortlessly monitors temperature, humidity, CO² and light. This module comes with a 16 ft. cord to connect to our Link4 hydroponic controllers.

Improve plant quality, while increasing production with Johnson Gas CO₂ Generators. These generators automatically provide the carbon dioxide needed to meet maximum growing potential for only pennies per day.

- Easy to install in any greenhouse, without expensive duct work.
- CO₂ is diffused evenly throughout greenhouse. No supplemental fans required.
- Small size for easy movement.
- Constructed from high-quality steel for corrosion resistance and long life.
- Controls subject to rigorous testing during production to ensure safe and proper operation.
- Automatic gas shut-off in case of pilot failure.
- Based on one air exchange per hour, 1,500 ppm can be obtained per unit in a 4,800 sq. ft. greenhouse or an equivalent 50,000 cu. ft. volume.
- Transformer is required for operation. Can operate up to three units with one transformer. 115 V/24 V, 40 VA.
- 1 year manufacturer's warranty.

La Crosse Technology Weather Stations allow you to stay on top of your work or business by providing detailed and essential weather information.

- Portable, compact stations fit just about anywhere.
- Clear, functional design with easy-to-read digital display.

Wireless Thermometer (116185)

- Displays indoor and outdoor temperature in Fahrenheit and Celsius and indoor humidity.
- Records HI/LO temperatures.
- Shows temperature trend indicators with time.
- Hang on a wall or leave freestanding.
- Features both a signal strength indicator and low battery notification.

116185

Wireless Weather Station (113876)

- Indoor and outdoor temperature and humidity readings, as well as minimum and maximum records for both.
- Programmable temperature alerts.
- Displays six moon phases.
- Features a 12 and 24 hour time display and calendar.
- Alarm with snooze.
- Sensor signal strength indicator.
- Low-battery indicator.

113876

Wireless Color Forecast Station (113872)

- Clear and eye-catching color display with dynamic forecast icons that allow for quick and immediate readings.
- Indoor and outdoor temperature and humidity readings, as well as minimum and maximum records for both.
- Temperature and humidity trend indicators.
- Programmable temperature alerts.
- Displays heat index and dew point.
- 12 and 24 hour time display, alarm with snooze and calendar.
- USB charging port on the back of the unit.
- Adjustable backlight.
- Low-battery indicator.

113872

Professional Weather Center (117165)

- Displays hourly and daily forecast with six dynamic color icons.
- Temperature and humidity readings with customizable alerts and Hi/Lo records with time stamps. Indoor temperature range of 32°F - 99°F (0°C - 37°C), outdoor temperature range of -40°F - 140°F (-40°C - 60°C) and an indoor/outdoor humidity range of 10% - 99%.
- Features a wind sensor with a range of 0 mph to 111.8 mph (0-180 kph).
- Rain sensor reads accumulation from 0" - 393.6" (0-9,999.99 mm).
- Displays foliage changes seasonally.
- Features 12/24 hour time settings, a calendar that displays day, month, date and year, as well as a full day of the week display.
- Transmission can reach up to 400'.
- Station displays have 5 levels of adjustable backlight and programmable auto dim.
- Sensor and Wi-Fi connection indicator.
- Comes with full range adjustable kickstand, but can also be hung.
- Low battery indicator.

Increase safety, brighten up those outdoor areas.

- Please note: High Intensity Discharge lighting, commonly called HID lighting, requires a special fixture and ballast for each type and wattage. The bulb wattage must be matched to the ballast rating. Using the incorrect bulb in a ballast can result in problems such as overheating and bulb damage which may result in premature ballast failure.

The handiest cart you will ever own.

- Sturdy, corrosion-resistant, aluminum alloy construction.
- Rolls smoothly over all surfaces on 2.125" x 20" heavy-duty pneumatic tires.
- Folds up for easy storage.
- Capacity: 250 lbs.
- Bed dimensions: 23-1/2"W x 11-1/2"D x 35-1/2"L.
- Overall dimensions: 36"W x 26"H x 52"L.

ALUMINUM FOLD-UP CART

STK#	EACH
109630	\$325.95

Poly Dump Cart's tow hitch arm doubles as a dumping handle.

- Large, 600 lb. capacity. 10 cu. ft. tub is made of rugged poly, so it will never rust.
- Easy to clean even after hauling manure, soil, yard waste and more.
- Large diameter handle for pushing by hand, or pull by universal 1/2" pin hitch using ATV, car or truck.
- Tow hitch arm, with stabilizing caster, extends 21.5" and controls the dump function. Folds under and out of the way when used as a cart.
- Rolls easily on 4" x 16" pneumatic tires with 19 mm axle.
- Dump bed measures 37"W x 11.8"D x 47.6"L.
- Overall size: 37"W x 69"L.

EZ-HAUL POLY DUMP CART

STK#	EACH
103870	\$235.95

Haul a little, haul a lot. EZ-Haul does it all.

EZ-Grow Professional Greenhouse Bench Kits are the perfect addition to any greenhouse.

- We've teamed up our most popular benches and top panels.
- Lightweight aluminum frames have sturdy legs with 4" x 4" galvanized foot plates.
- 13-gauge expanded metal top panels have diamond openings.
- Hot-dipped, galvanized finish protects the top panels from corrosive environments.
- 1-1/2" x 1" mesh size is ideal for air circulation and water drainage.
- Height: 28-1/4".
- Assembly required.

EZ-GROW BENCH KITS

STK#	SIZE	EACH	25 & UP
104250	2'W x 8'L	\$305.95	\$299.95
104251	4'W x 8'L	405.95	399.95

Bench on Wheels, in your choice of either white PolyMax® or expanded metal top, is ideal for greenhouses, manufacturing facilities, workshops, garages and more.

- Lightweight, extruded aluminum frame.
- 6" heavy-duty swivel casters allow for easy moving from one work area to the next, saving you time and money.
- Height: 35-3/4", includes casters.
- Assembly required.

Two great bench tops to choose from, depending on your application:

- 13-gauge expanded metal bench top has 1-1/2" x 1" diamond openings that allow for air circulation and water drainage. Hot-dipped, galvanized finish protects from corrosive environments.
- The indestructible white PolyMax® bench top is maintenance-free and weatherproof. Easy to clean, it makes a great addition to your workshop area.

BENCHES

Our Rolling Greenhouse Benches allow you to easily maximize growing space and promote a more organized operation.

- Grow more in the same space. Rolling Greenhouse benches allow operations to improve functionality by creating moveable aisles and allowing operations to quickly change their layout.
- Benches roll with a maximum load of 27 lbs. per sq. ft.
- These benches ensure the utmost durability in any growing environment. The bench frames are constructed from 1.25", 14-gauge galvanized steel and the 4" side rails are made from extruded aluminum.
- Designed with soft, finished corners for an attractive appearance and improved safety.
- Features stainless steel fasteners that are topped with expanded metal.
- 17-1/2" cantilever.
- For custom benches, contact a Greenhouse Specialist at extension 1265.
- Benches are 32" tall.
- Trellis kits are available in matching sizes.
- Custom leveling for sloped ground is available.
- Easy-to-use crank systems are available. These systems allow for benches and trays to be moved and managed with minimal effort. Optional crank kit sold below.

NEW Easily connected for quick expansion, Ebb & Flo trays provide various length options for greenhouse growers.

- End and middle trays are easily interlocked to expand and meet the needs of any greenhouse or grow room.
- Manufactured with durable ABS plastic with built in UV-inhibitors, which minimizes fading and yellowing from grow lights.
- Available in 4', 5' and 6' widths for both end and middle tray options.
- Quick valve feature allows for easy drainage.
- Sump options 117365, 116069 and 116072 feature a lower channel for natural drainage.
- Quickly seal with Ebb & Flo Tray Sealing Compound (116074).
- All of the 5' W trays (116068, 116069, and 116070) are 79" long.
- All of the 6' W trays (116071, 116072, and 116073) are 60" long.

If you're tired of bending over to tend to your Dutch buckets, you'll love these benches. The Dutch Bucket Low Profile Bench lifts your buckets to the perfect height, but its list of uses doesn't end there.

- Benches come with optional leveler feet that can add height to the bench and enable you to slope the bench.
- Great for any greenhouse need that requires a low-profile bench; you can create your own tiered display, display taller plants at eye level and more.
- Made from galvanized, 1.5" steel tube and galvanized expanded metal. The benches have been constructed without welds to reduce the risk of corrosion.

DUTCH BUCKET LOW PROFILE BENCH

STK#	SIZE	EACH
115050	12"W x 72"L x 7"H	\$159.95
115051	12"W x 144"L x 7"H	275.95
113179	19"W x 144"L x 7"H	339.95
113180	19"W x 72"L x 7"H	199.95

Get your propagation tray moving. Quickly transport and transplant seedlings and plants, so that you can spend less time preparing and more time growing.

- 48"W x 96"L grow bench and tray on casters allows your propagation tray to glide throughout your growing space.
- The frame is made from corrosion-resistant, galvanized steel tube and is strong enough to hold 1,000 lbs. when stationary or 300 lbs. while moving. Frame can be easily assembled on site.
- To accommodate taller plants and grow lights there is an optional Trellis and Light Bar frame (113205).
- Bulb sold separately.

ROLLING BENCH AND TRAY

STK#	ITEM	EACH
113204	48" x 96" Rolling Bench with Tray	\$1,185.00
113205	Rolling Bench Light Bar and Trellis	185.00

These Three-Tier Greenhouse Benches were designed to facilitate propagation, allowing your crops to get a strong start.

- The Three-Tier Greenhouse Benches come with flood and drain trays.
- Ultra-durable construction allows these benches to withstand any growing environment. The frames are constructed from 1.5", 14-gauge galvanized steel and the 4" side rails are made from extruded aluminum.
- Corners are made from plastic, which eliminates hard, sharp corners and provides a finished appearance.
- Each tier features a continuous tray with a sump end for flood and drain operation.
- There is 25" between tiers, so growers have plenty of room to hang grow lights.
- The benches are 8'-3" tall and come with adjustable leveling feet.

PolyMax® Bench Systems will last a lifetime.

- Available in two sizes as either a complete system with legs or as a bench top only.
- Frame and legs are manufactured from our 1.5" square USA-made, triple-galvanized steel tubing that is rust and corrosion resistant.
- Indestructible PolyMax® Bench Panels allow maximum air circulation around plants and reduce cleaning time and labor costs. This durable, yet lightweight material will not rot, rust or corrode. Easy to clean and able to withstand high-pressure washings and disinfectants, offering ideal drainage no water or soil buildup.
- Height of complete Bench System with legs: 30"H.
- Create any length system you need. Simply start with our 4' x 8' PolyMax® Bench with legs (108293SE). Our "Add-On" Benches are available in 8' sections only and allow you to expand your growing area at any time. Add on multiple bench units to achieve the desired length that best suits your growing needs.

This UV-resistant greenhouse material is 12 times lighter than glass. These easy-to-handle, lightweight sheets are a breakthrough in greenhouse technology, and they can be used to provide crops with lighting or as a blackout option.

- Also widely used for construction, rain shields and soundproofing applications.
- Will not film over after long exposure to sunlight.
- Tough, practically shatterproof, 8 mm polycarbonate material maintains light transmission over years of use.
- Hollow, twin-wall construction gives superior insulating capabilities for better heat retention and lower fuel costs.
- Weighs only 1.5 KG/m²—1/12 the weight of glass.
- Virtually no UV penetration.
- Highly flame resistant, with a flashpoint of 1,166°F.
- 10 year warranty.

WARNING: Cancer and Reproductive Toxicity - P65Warnings.ca.gov

ENVIRONMENTAL

Tri-layer, heavyweight greenhouse film is black on one side and white on the other. Primarily used as a reflective cover in vegetable production, it can also be used to create a blackout environment.

- 5 mil, 18 month, tri-layer Black/White film is UV stabilized to last up to two full years when used under greenhouse roof.
- Excellent tear and puncture resistance.

Reflective Film:

Reflects light to lower leaves for more efficient use of greenhouse transmitted light for both ground and bench crops. Crops grown in conjunction with reflective film covers have lower root zone temperatures, which is very important during summer production.

5 MIL BLACK/WHITE REFLECTIVE FILM

STK#	ROLL SIZE	EACH	2 & UP	STK#	ROLL SIZE	EACH	2 & UP
108597	25'W x 150'L	\$399.95	\$385.95	108605	50'W x 100'L	\$535.95	\$515.95

- Use as either a reflective bench covers or to create a blackout environment.
- Also ideal as an airtight animal feed storage for hay and corn silage.
- Available in full rolls only.

Blackout Film:

When used with the white surface away from the crop, film provides maximum light blockage. Control the photo period of greenhouse crops for selected plant species, such as orchids and other tropical plants and flowers, to imitate flower bud production. Keeps the plant environment warm, maintains better heat distribution, without heat buildup or stress and will reduce your energy costs.

Custom Blackout Tarps provide exceptional light deprivation with quality fabric to ensure total darkness.

- Tarps are made from medium weight light deprivation fabric that is woven from high density polyethylene slit tapes and coated to ensure complete blackout conditions.
- Enhanced UV protection.
- Dirt shedding LDPE coating.
- Ultra-durable construction features 180 lbs/in Warp and 125 lbs/in Weft.
- 50 lbs/in Tongue tear.
- 275 psi Mullen burst strength.
- 116998 is sold by the foot. 117068, 117069 and 117070 are sold by the square foot.

Custom-cut lengths under 50'L incur a small-panel charge of \$12.00.

Low-cost solution to your greenhouse fabric needs.

- This Heavy Duty, woven polyethylene features an anti-condensate additive on one side that reduces moisture buildup and dripping.
- 85% light transmission.
- Designed to stand up to just about any climate.
- Resists rips and tears.
- UV additives allow the fabric to maintain its strength, ensuring a dependable greenhouse fabric with a long life.
- Available in 5.2 oz., 11 mil and 7.5 oz., 16 mil.
- 144" wide, priced by the linear foot.
- Made in the USA.

GREENHOUSE FABRIC

STK#	ITEM	PRICE PER LINEAR FT.	
		EACH	DISCOUNT PRICE
115995	5.2 oz., 11 mil Greenhouse Fabric	\$4.08	\$3.51 (600' & up)
115996	7.5 oz., 16 mil Greenhouse Fabric	5.35	3.96 (500' & up)

Sun Master® Pull-and-Cut Clear Greenhouse Film offers 92% light transmission and repels dust and dirt to keep the light shining through.

- Ideal for both single and double-layer greenhouse applications.
- Strong copolymer resin for excellent durability.
- Tri-layer construction gives maximum physical properties and superior film life.
- High clarity, 6 mil 4 year covering contains UV protectors.
- Special-cut lengths mean you get the exact amount you need.
- Priced per linear ft.

SUN MASTER® 6 MIL 4 YEAR CLEAR GREENHOUSE FILM

STK#	WIDTH	PRICE PER LINEAR FT.	
		1'-199'	200'-999'
108654	6'	\$0.93	\$0.84
108655	10'	1.49	1.41
108656	20'	3.02	2.82

108658	36'	5.45	5.06
108659	40'	6.05	5.61
108660	42'	6.39	5.88
108661	48'	7.23	6.66
110028	56'	8.29	7.96
110029	64'	9.39	9.01

Custom-cut lengths under 50'L incur a small-panel charge of \$12.00.

Infrared retention and anti-condensate additives mean superior diffusion rates, heat retention and tensile strength. This premier 6 mil thermal film offers huge savings on energy costs.

- Co-extruded copolymer resin tri-layer construction offers maximum physical properties for superior film life.
- Infrared (IR) additives provide excellent diffusion and absorb and radiate infrared heat back down to the crop during the evening hours, saving as much as 30% on heating costs.
- 88% light transmission.
- 52% diffused light transmission means improved, more uniform plant growth.
- Drip control additive is incorporated throughout the film and provides superior condensation control.
- UV stabilized for up to four years of film life.
- Available in full rolls or custom-cut lengths.

SUN MASTER® INFRARED ANTI-CONDENSATE THERMAL GREENHOUSE FILM
